II.2.1) Title

Lot 1 Technical Support

Lot No

1

II.2.2) Additional CPV code(s)

- 73112000 - Marine research services

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The scope of work is for the provision of Subsea Power Cable Marine Technical Consultants (MTC) to support the Engineering, Procurement, and Construction (EPC) installation activities related to the EGL1 HVDC cable project.

EGL1 is a crucial part of the solution to achieve the Government's 2030 renewable energy target. The project is designed to significantly increase the UK's capacity to transport clean renewable energy to consumers by improving the capability and resilience of the electricity transmission network between Scotland and England. Once complete, EGL1 will deliver enough electricity for two million homes.

The project consists of a 196km long high voltage direct current (HVDC) link, that includes 176km of subsea cables that will be installed from south of Thorntonloch beach, through Scottish and English waters to a landfall point just north of Seaham, in County Durham. The Project is the first contracted cable system in the UK to utilise 525 kV HVDC (High Voltage Direct Current) technology with extruded XLPE insulation, with a power transmission capacity of 2 GW.

The MTC will offer professional, independent technical expertise to the project, serving as an integral team member(s) immersed in daily activities and integrated into the offshore delivery team. Continuous collaboration between the Marine Project Manager and the MTC provider will be maintained to ensure coordination and adherence to project needs and objectives.

The primary role of the MTC is to provide specialised knowledge and technical support in subsea power cable marine activities, utilising their expertise to progress the Project, address challenges and enhance Project efficiency. The MTC shall actively participate in key decisions across all Project stages, ensuring their technical insights contribute to the success of the Project. The MTC role includes ensuring the quality and compliance of subsea power cable marine activities, aligning with industry standards and project specifications. The MTC will contribute to comprehensive reporting, documenting key technical insights, decisions and project developments.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Start date

1 June 2024

End date

31 December 2029

This contract is subject to renewal

No

- 73112000 - Marine research services

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The scope of the appointment is the following:

The scope of work is for the provision of Offshore Client Representatives (OCR) to support the Engineering, Procurement, and Construction (EPC) installation activities related to the EGL1 HVDC cable project. EGL1 is a crucial part of the solution to achieve the Government's 2030 renewable energy target. The project is designed to significantly increase the UK's capacity to transport clean renewable energy to consumers by improving the capability and resilience of the electricity transmission network between Scotland and England. Once complete, EGL1 will deliver enough electricity for two million homes.

The project consists of a 196km long high voltage direct current (HVDC) link, that includes 176km of subsea cables that will be installed from south of Thorntonloch beach, through Scottish and English waters to a landfall point just north of Seaham, in County Durham.

The Project is the first contracted cable system in the UK to utilise 525 kV HVDC (High Voltage Direct Current) technology with extruded XLPE insulation, with a power transmission capacity of 2 GW.

The OCR will offer professional, independent assurance to the project, serving as an integral team member(s) immersed in daily vessel activities and interfacing with the offshore delivery team. Continuous collaboration between the Marine Project Manager and the OCR provider will be maintained to ensure coordination and adherence to project needs and objectives.

The OCR shall act on behalf of the Employer under the contract in relation to the marine operations. The main responsibility will be to monitor and report the progress of the works of the Contractor to ensure conformity with the contractual agreement with regards to technical specification, quality, health, safety, and protection of the environment. The OCR shall inform the Employer of any deviations from the contractual agreement by the Contractor delivering the offshore works.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Start date

1 June 2024

End date

31 December 2029

This contract is subject to renewal

No

Following receipt of this information EASTERN GREEN LINK 1 LIMITED will invite you to the Ariba event where all the pre-qualification documentation is contained including further instructions.

Section III. Legal, economic, financial and technical information

III.1) Conditions for participation

III.1.8) Legal form to be taken by the group of economic operators to whom the contract is to be awarded

No specific legal form is required in order to participate in the procurement stage. However, we reserves the right to require

successfully appointed suppliers to take a specific legal form and/or accept joint and several liability if constituted as a group of economic operators.

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Negotiated procedure with prior call for competition

IV.1.4) Information about reduction of the number of solutions or tenders during negotiation or dialogue

Recourse to staged procedure to gradually reduce the number of solutions to be discussed or tenders to be negotiated

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

IV.2) Administrative information

IV.2.2) Time limit for receipt of tenders or requests to participate

Date

18 March 2024

Local time

11:00am

IV.2.4) Languages in which tenders or requests to participate may be submitted

English

IV.2.6) Minimum time frame during which the tenderer must maintain the tender

Duration in months: 6 (from the date stated for receipt of tender)

Section VI. Complementary information

VI.1) Information about recurrence

This is a recurrent procurement: No

VI.3) Additional information

Interested parties should note that EASTERN GREEN LINK 1 LIMITED is using the Ariba portal, details in Section I.3 and 11.2.4. of this notice. All documentation will be made available through

this portal.

All communications by interested parties must be made to the contacts in Section 11.2.4 . Once Interested parties have been invited to the Ariba Event, EASTERN GREEN LINK 1 LIMITED will then only communicate through the portal. Communications sent by alternative means and/or to any other person will be ignored.

Please note that a "request to participate" for the purposes of section IV.2.2 of this notice is by completion and return of the Pre-Qualification Questionnaire (PQQ), which is available through

the Ariba portal, by the stated deadline. Interested parties should note that EASTERN GREEN LINK 1 LIMITED reserves the right to cancel or vary this procurement process at any stage. EASTERN GREEN LINK 1 LIMITED may also change the basis, procedures and/or timescales set out or referred to within the procurement documents. EASTERN GREEN LINK 1 LIMITED will not be liable for any costs or expenses whatsoever incurred by interested parties in participating in this procurement process.

VI.4) Procedures for review

VI.4.1) Review body

High Court

Royal Courts of Justice, The Strand

London

WC2A 2LL

Country

United Kingdom
