Details of the award decision-makers: NHS LLR ICB Strategic Commissioning Group on 19th of November 2024

Any declared conflicts or potential conflicts of interest of individuals making the decision and how these were managed:

- Potential conflicts of interest for the GP member of the LLR ICB Strategic Commissioning Group on 19/11/2024 were considered; however the non-conflicted members assessed the nature and risk of this potential conflict, and determined that there were no conflicts of interest impacting on this decision and no further action was required in this regard.

The provider's been considered in accordance with basic selection criteria schedule 16 of PSR and in proportion to the financial risk of the contract value.

Relative importance and rationale for the relative importance of the key criteria, and the rationale for choosing the provider with reference to the key criteria:

- Key Criteria 1. Quality and innovation: There are KPIs associated with this service currently, which the provider consistently meets; The provider submits regular reports in a timely manner for activity completed, and these are reviewed at contract monitoring meetings.

- Key Criteria 2. Value: This service offers value financially and to the local healthcare community as patients continue to access services within a primary care setting across three sites, which reduces demand on more costly services.

- Key Criteria 3. Integration, collaboration and service sustainability: The Provider has worked to integrate across the system, working with other GP practices, DHU services,

NHS 111 and ED. The provider supports other partner organisations at times of peak demand, for instance in developing deflection routes from ED to the hubs to enable patients to be seen in more appropriate settings.

- Key Criteria 4. Improving access, reducing health inequalities and facilitating choice: Patients are able to receive primary care services within a local healthcare setting including during evenings, weekend and bank holidays. The provider is responsive to local demands and system partner needs.

- Key Criteria 5. Social value: The service provision contributes to environmental impact, offering services embedded in local communities and providing local employment opportunities.
