II.1.4) Short description

This Notice seeks to obtain market feedback (via sounding questionnaire) in relation to the future procurement of a strategic partner for the provision of a managed service for Transport for London's car park portfolio. The primary focus at this stage is to better understand current market, supplier appetite, advancements in technology, capacity and capability, as well as perceived risks and opportunities. This will allow TfL to develop its requirements ensuring they align with existing market conditions along with emerging developments. We are interested in your feedback and early engagement. If this PIN is applicable to you and you wish to find out more details, TfL is welcoming interested suppliers to participate in a market sounding questionnaire. To receive this please contact ChristopherStylianou@tfl.gov.uk. The deadline for market sounding questionnaire responses is 2 p.m. GMT on 9th April 2021. PLEASE NOTE: This PIN is not a call for competition. Commencement of a procurement exercise to award this opportunity will be published through a separate OJEU Notice. Transport for London is planning to procure a strategic partner for the provision of a managed service for Transport for London's car park portfolio. This PIN provides notification to participate in a market sounding questionnaire. Commencement of a procurement exercise to award this opportunity will be published through a separate OJEU Notice.. Transport for London currently has a portfolio of 79 station car parks across its transport network. These car parks are adjacent to London Overground, London Underground and TfL Rail stations, providing customers with a convenient and competitively priced facility. The objective with this car park portfolio, is to consider how best to maintain revenue and customer benefit, while also future proofing for longer term demands and opportunities for car parking space to support Mayoral goals. These goals include the delivery of outcomes that; improve the travelling experience of customers using the station; meet the Mayor's healthy streets agenda through promoting active travel, improving air quality or public realm; or support local economic development. The current scope includes car park management services including both traditional PCN enforcement and ANPR, alongside technology project management and various revenue and inventory management functions. There is also provisions for the installation and management of bay sensors.
