## **VII.2) Information about modifications**

### **VII.2.1) Description of the modifications**

Nature and extent of the modifications (with indication of possible earlier changes to the contract):

Duration extended from 31st March 2021 to 31st March 2022 to allow for testing of c. 7000 research samples from the RECOVERY clinical trial.

### **VII.2.2) Reasons for modification**

Need for additional works, services or supplies by the original contractor/concessionaire.

Description of the economic or technical reasons and the inconvenience or duplication of cost preventing a change of contractor:

The Rare and Imported Pathogens Laboratory (RIPL) based at PHE Porton (Salisbury), providing the SARS-CoV-2 IgG antibody testing service, have experience in handling samples from NHSBT meeting all criteria specified in section 4.1 of the Project Schedule (dated 3rd March 2021). It is the only facility of its type within the UK that has the expertise to perform a quantitative test for SARS-CoV-2 IgG with a linear correlation with neutralising antibody over a very wide range of titres at the scale and speed required to meet the time pressures associated with the convalescent plasma programme.

### **VII.2.3) Increase in price**

Updated total contract value before the modifications (taking into account possible earlier contract modifications, price adaptations and average inflation)

Value excluding VAT: £275,000

Total contract value after the modifications

Value excluding VAT: £380,000
