NUTS codes

- UKD - North West (England)
- UKM - Scotland

II.2.4) Description of the procurement

First Transpennine Express (TPE) has a business plan commitment (BPC) to renew the legacy station CCTV deployed across its station network with a new, fit-for-purpose VSS / CCTV solution. This new VSS/CCTV solution shall not only address the serious obsolescence

risks that exist on the current CCTV infrastructure, it will also play a strategic role in the future management of station operations and improved customer experience through the network-wide deployment of video analytics and new camera technologies (AI).

The purpose of the Project Requirement Specification document is to define the scope of works and deliverables that are required for this important project.

TPE are seeking bidders to provide detailed proposals that are.

- compliant with railway industry and UK national standards
- High functionality, innovative and transformational
- robust and proven technologies
- cost certain and provides measurable value to TPE and its stakeholders

Existing TransPennine Express CCTV assets have significantly exceeded their 15-year asset

life expectancy and are now all exhibiting age-related problems with increasing failures that

are impacting the operational safety, service quality and passenger experience across the network.

II.2.11) Information about options

Options: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Negotiated procedure with prior call for competition
