II.2.4) Description of the procurement

Ground preparation will include different work types carefully chosen for each site, so that soil disturbance is minimised, whilst still delivering a beneficial planting position. This may be achieved through brash raking, mounding (hinge/inverted patch/continuous), screening, mulching or scarification. Tracked and Walking excavators may also be used if appropriate. Ground preparation works may also include the creation of drainage channels, or the maintenance of existing drainage channels and the construction of ATV tracks.

II.2.4) Description of the procurement

Tree planting work is seasonal and only starts in earnest once the trees grown by our provider have become dormant (September, or later). The season ends in the spring, as the weather becomes warmer and drier (usually around April). For the purposes of this PIN, Tree Planting will cover planting on mounded ground, on Scarified ground, screef planting, direct planting, planting treated plants, planting on walking excavator sites, beat up and underplanting, and fitting / removing stakes and tubes.

An element of mechanised planting may also be included, which is achieved by purpose built machine and or attachment combining both ground preparation and the planting

of trees in a single operation, allowing for trees to be planted outside of the traditional planting season.

II.2.14) Additional information

Lotting structure may be subject to change.
