This is a Provider Selection Regime (PSR) intention to award notice. The awarding of this contract is subject to the Health Care Services (Provider Selection Regime) Regulations 2023. For the avoidance of doubt, the provisions of the Public Contracts Regulations 2015 do not apply to this award. The publication of this notice marks the start of the standstill period. Representations by providers must be made to decision makers by 7th February 2025. Representations should be sent via email to: Christopher.sherwood@nhs.net. Award decision makers are: Director of Dental & Planned Care Services & Operational Lead Dental Services. This contract has not yet formally been awarded; this notice serves as an intention to award under the PSR. There were no conflicts of interest. The rationale behind the relative importance of the key criteria that Kent Community Health NHS Foundation Trust used to make the decision: Quality & Innovation (patient satisfaction). KCHFT are unique to employ the services of a CDT to carry out denture work for domiciliary patients. Patients receive their appliances in a timely manner and much quicker than could be achieved by visiting a dentist. The current service was co-designed with the provider. Service improvement is a routine discussion at contract review meetings. Patient satisfaction scores are consistently high at 99.3% across CDS services with no complaints relating to the CDT service. Integration, collaboration and service sustainability:- The current CDT service is integrated within the CDS service and has proved to work in collaboration with clinicians and managers when managing domiciliary patients requiring denture work. The CDT also completes their own lab work negating the necessity of additional drivers to collect and return lab work which in turn reduces our carbon footprint. Improving access, reducing health inequalities and facilitating choice:- Providing a service for domiciliary patients. The CDT service offers a wider choice of appointment times for home visits which improves access and choice. Denture work is completed in a timely manner which reduces health inequalities for home bound patients. Value:- This is an activity based contract and value for money is key. Utilising a CDT is more cost effective than a DO providing this service. It also allows DO's to focus on other clinical treatment, keeping the waiting times to a manageable level which keeps the reference costs for the CDS down. Social Value:- Providing value for money by reaching a vulnerable cohort of patients and providing dental prosthetics in a timely manner. This further allows time for DO's to attend to other routine and urgent treatments required by patients. Award of a contract without prior publication of a call for competition in the cases listed below. The procurement falls outside the scope of application of the
