The TSS supports traders to submit declarations via a digital platform with self-serve guidance and contact centre support on how to complete digital declarations. The service will be free to access for businesses moving goods between Northern Ireland (NI) and Great Britain (GB) under the Windsor Framework.

The Trader Support Service is made up of two key elements:

- System: A digital platform system to enable traders to submit information to meet requirements under the Windsor Framework.

- Service: Customer support service, providing information and guidance for businesses on how to submit compliant declarations and the steps they need to take to comply with regulations. This includes self-serve guidance such as written guides, webinars, videos, and process maps, as well as a responsive Contact Centre where traders can raise a range of enquiries.

The future contract is expected to be awarded in November 2025, for commencement of a rigorous mobilisation plan from December 2025. Following mobilisation, the future contract services shall run for an initial period of 5 years, with the option to extend for two further periods of 12 months.

The procurement is being undertaken using a "Competitive Dialogue" procedure (in accordance with Regulation 30 of the Public Contracts Regulations 2015). Under the first stage of the process, bidders are required to complete a Selection Questionnaire ("SQ Stage"), which consists of mandatory requirements assessed on a pass/fail basis, and a series of qualitative questions to be evaluated to determine potential suppliers' technical and professional ability. Following evaluation of submitted SQs, HMRC will issue an Invitation to Participate in Competitive Dialogue to shortlisted bidders ("IPCD stage") and subsequently an Invitation to Tender ("ITT Stage"). Full details of the requirements, the SQ and the overall procurement process and how to participate are included in the SQ documents available in the event on the SAP Ariba eSourcing Portal.

Interested suppliers will be required to provide their latest financial accounting information and will have this assessed by the Contracting Authority in line with Regulation 58 of the Public Contracts Regulations 2015 to ensure that the potential future contracting entity

has the economic capability to deliver a contract of this size, which has an estimated contract value of circa £370m over its potential 7-year duration (5+1+1).

In line with Regulation 58(8) of the Public Contracts Regulations 2015, the Authority requires that interested suppliers (and for the avoidance of doubt, in the case of consortia this means the contracting entity) have a minimum annual turnover of £50m in order to participate in this Procurement and reserves the right to reject any SQ responses that do not meet this threshold.
