LW150

## Description

The purpose of this project is to evaluate efficacy and safety of a range of existing and new antivenoms with, developing evidence for policy-makers on the optimum antivenoms for their countries. This tender will cover the analysis of the clinical samples collected during the ANYSNAKES trial. In addition to this a subset of samples will be part of our trial looking at small molecule which can inhibit venom (TOCSINS). This procurement is intended to establish a supplier relationship that can support the initial study described, as well as future studies of a similar nature that may arise during the contract period. Each additional study will be confirmed through an agreed task order or variation.
