NUTS codes

- UKG - West Midlands (England)

II.2.4) Description of the procurement

Supply and Installation of Cremation and Mercury Abatement Equipment

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Negotiated without a prior call for competition

- Extreme urgency brought about by events unforeseeable for the contracting authority

Explanation:

The procurement has been awarded utilising the negotiated procedure without prior publication utilising regulation 32(2)(b)(ii) “competition is absent for technical reasons”. This is a compliant route to market under the Public Contract Regulations 2015 and Council’s Contract Procedure Rules. The contract will be awarded following a 10day standstill period concluding on 29/03/2021.

Due to an increase in the volume of cremations, the requirement to replace end of life equipment (which is uneconomical to repair) and the need to install a mercury abatement system, new cremation equipment is required. Due to the proprietary nature of the current equipment and systems already in situ, technically it is not possible to integrate a competitor system. Correct system integration is critical in ensuring the environmental impact of the equipment is contained and meets required legislation for cremation and air quality standards.

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

Section V. Award of contract/concession

A contract/lot is awarded: Yes

V.2) Award of contract/concession

V.2.1) Date of conclusion of the contract

19 March 2021
