- 72322000 - Data management services

II.2.3) Place of performance

NUTS codes

- UKH3 - Essex

Main site or place of performance

Mid and South Essex

II.2.4) Description of the procurement

The contracting authority (hereinafter referred to as "the Authority") for this Contract Award Notice are Mid and South Essex Integrated Care Board.

The Authority has awarded a contract to NHS Arden and Greater East Midlands Commissioning Support Unit following publication of a voluntary ex-ante transparency notice which expired on 3rd January 2023 12:00 midnight. The contract will be for 24-month contract (1st July 2023 - 30th June 2025) with the option to extend the contract by up to an additional 12-month period (1st July 2025-30th June 2026); a maximum contract term of 36-months for the provision for the provision of Primary Care (GP) IT Service Management and Primary Care Enabling Services for Primary Care, Pharmacists, Optometrists and Dentists (PODs) across Mid and South Essex.

The national guidance confirms that Commissioning support units (CSUs) operate within the NHS family across England, providing services that have been independently evaluated for quality and value for money. The expectation is that CSUs will continue to develop as trusted delivery partners to ICSs, providing economies of scale.

Nationally NHS England have put in place a moratorium to protect core CSU services

whilst clinical commissioning groups (CCGs) are dissolved and transitioned to ICB. No definitive date has been given for when the protected status will end.

The Authority had concluded that there is an unacceptable risk associated with change of service provision whilst the system is in a significant state of transition and valuable resources must be duly focused on ensuring Business as Usual (BAU) services and steady state across the new MSE ICB. The Authority deems that the incumbent provider is the only technically capable provider to deliver the services within the timescale and budget available. Additionally, there is insufficient time to complete a robust contract mobilisation, involving critical mobilisation and transition risks including workforce and transfer of data and systems, which is estimated to require 12+ months to implement in a robust and safe manner, based on previous experience. In the face of current ICB transition environment and in the absence a longer mobilisation period, no reasonable alternative or substitute exists.

The Authority had decided that the best solution to ensure that Primary Care users across Mid and South Essex benefit from Primary Care (GP) IT Service Management is to ensure continuity of service provision with the existing supplier, who is uniquely placed to successfully deliver GP IT Service Management in accordance with the NHS England Moratorium and the available timescales.

The Authority will award the contract utilising the NHS supply of goods and provision of service, with similar contract mechanisms utilised within the Health Systems Services Framework (HSSF).

In accordance with Regulation 72 (1) (a) of the PCR 2020 (as amended), the services covered by the arrangement may change and expand as the Service develops in accordance with national guidelines and mandates in relation to operating principles for the funding applications for Primary Care (GP) IT Service Management.

II.2.5) Award criteria

Quality criterion - Name: Quality / Weighting: 100

Price - Weighting: 0

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The procurement falls outside the scope of application of the regulations

Explanation:

This contract award notice follows a voluntary ex ante transparency notice and is intended to provide notice of MSE ICB's intention to award a 12-month contract (1st July 2023 - 30th June 2024) with the option to extend the contract by up to an additional 12-month period (1st July 2024-30th June 2025); a maximum contract term of 24-months. It is MSE ICB's intention to award this contract to the existing supplier, NHS Arden and Greater East Midlands Commissioning Support Unit (AGEM CSU) for the provision of Corporate IT Service Management to Mid and South Essex integrated Care Board.

The national guidance confirms that Commissioning support units (CSUs) operate within the NHS family across England, providing services that have been independently evaluated for quality and value for money. The expectation is that CSUs will continue to develop as trusted delivery partners to ICSs, providing economies of scale.

Nationally NHS England have put in place a moratorium to protect core CSU services whilst clinical commissioning groups (CCGs) are dissolved and transitioned to ICB. No definitive date has been given for when the protected status will end.

The ICB have concluded that there is an unacceptable risk associated with change of service provision whilst the system is in a significant state of transition and valuable resources must be duly focused on ensuring Business as Usual (BAU) services and steady state across the new MSE ICB. The ICB deem that the incumbent provider is the only technically capable provider to deliver the services within the timescale and budget available. Additionally, there is insufficient time to complete a robust contract mobilisation, involving critical mobilisation and transition risks including workforce and transfer of data and systems, which is estimated to require 12+ months to implement in a robust and safe manner, based on previous experience. In the face of current ICB transition environment and in the absence a longer mobilisation period, no reasonable alternative or substitute exists.

MSE ICB have decided that the best solution to ensure that corporate users across Mid

and South Essex benefit from Corporate IT Service Management is to ensure continuity of service provision with the existing supplier, who is uniquely placed to successfully deliver Corporate IT Service Management in accordance with the NHS England Moratorium and the available timescales. As such the ICB propose to award a contract to AGEM CSU for the provision of Corporate IT Service Management, service delivery commencing 1st July 2023-30th June 2024 (with the option to extend by a further 12 months).

The contracting authority will award the contract utilising the NHS supply of goods and provision of service, with similar contract mechanisms utilised within the Health Systems Services Framework (HSSF).

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

IV.2) Administrative information
