Ministry or any other national or federal authority

**I.5) Main activity**

General public services

---

**Section II: Object**

**II.1) Scope of the procurement**

**II.1.1) Title**

UK Greenhouse gas Inventory improvement programme

**II.1.2) Main CPV code**

- 90700000 - Environmental services

**II.1.3) Type of contract**

Services

**II.1.4) Short description**

BEIS is seeking to procure services to deliver scientific, technical & digital improvements to the Greenhouse Gas Inventory System. The GHG Inventory System is used to calculate economy-wide emissions of GHGs across UK territory from 1990 to the present day, to measure progress against climate targets.

We require:

- Scientific/technical services which would take existing inventory methodologies and – using the latest available science – update these to improve the transparency, accuracy and completeness.
- Technical/digital services to ensure methodologies in the inventory system use state-of-the-art software and existing software systems can be upgraded where needed
- Programme management, to ensure that the services commissioned through this contract are delivered on time, to quality and delivery risks are identified and managed

This will be a time and materials contract over 34 months.

BEIS is holding a supplier event on MS Teams on 22 March, consisting of a presentation by BEIS followed by 1:1s.

#### **II.1.5) Estimated total value**

Value excluding VAT: £3,000,000

#### **II.1.6) Information about lots**

This contract is divided into lots: No

### **II.2) Description**

#### **II.2.2) Additional CPV code(s)**

- 71351611 - Climatology services
- 72212461 - Analytical or scientific software development services
- 73110000 - Research services
- 90730000 - Pollution tracking and monitoring and rehabilitation
- 90731000 - Services related to air pollution

#### **II.2.3) Place of performance**

NUTS codes

- UK - United Kingdom

#### **II.2.4) Description of the procurement**

Our inventory meets domestic & international reporting requirements. A description of this system can be found at <https://naei.beis.gov.uk/about/national-inventory-system> and a full description of the methods used at [https://naei.beis.gov.uk/reports/reports?report\\_id=1015](https://naei.beis.gov.uk/reports/reports?report_id=1015)

In order to allow a pipeline of R&D to underpin inventory improvements as we move to the 2050 net zero target, we require:

- New inventory methodologies which estimate emissions from particular sectors with better accuracy, completeness & transparency
- reliable, robust and transparent inventory software, to support production of accurate & open inventory estimates

Skills needed are

- technical expertise in estimating GHG emissions from sectors, including land-use, industry, waste, energy [& agriculture].
- software expertise around the application of existing analytical tools (e.g. R, Python) to scientific problems, the development of models to process large datasets & SQL database expertise.
- a contractor with strong PPM expertise to manage this work

#### **II.3) Estimated date of publication of contract notice**

15 April 2022

---

## **Section IV. Procedure**

### **IV.1) Description**

#### **IV.1.8) Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: Yes

---

## Section VI. Complementary information

### VI.3) Additional information

Please register your interest for the supplier event by 5pm on 10th March, by sending your name, email, organisation and job title to [greenhousegas.statistics@beis.gov.uk](mailto:greenhousegas.statistics@beis.gov.uk), indicating whether you would like to book a 15-minute 1:1 slot with a member of the BEIS team; these are limited and allocated on a first-come first-served basis.
