Network Digitalisation PIN

II.1.2) Main CPV code

- 45259100 - Wastewater-plant repair and maintenance work

II.1.3) Type of contract

Works

II.1.4) Short description

Southern Water are looking to significantly and rapidly improve the visibility of the gravity wastewater network. We believe the new breed of low cost sewer monitors, now just starting to hit the market, presents a huge opportunity and positively changes the business case for mass deployment. Assuming that our business case assumptions can be verified this summer, we plan to install 10,000's of low cost sewer monitors from October 2021 and March 2022. Whilst deploying in parallel the associated analytics to make appropriate and effective use of the additional information to prevent sewer blockages developing into a pollution or flooding incidents.

- If you are able to supply Southern Water low cost (under £200 per unit) sewer monitors please complete:

Questionnaire 1. Supply of Monitors

- If you are able to provide Southern Water with and have experience of, delivering developed and tested analytical products or services for this application for please complete:

Questionnaire 2. Supply of Data Analytics

- If you are able to supply Southern Water an installation service for 1000s of low cost sewer monitors at multiple locations across the South East please complete:

Questionnaire 3. Installation of Monitors

We are looking to the market place to provide as much information as possible to help us shape our project and any future tenders that may arise following this exercise. The questionnaires are targeted to what we believe to be the different market elements required to successfully deliver this project. Please complete any or all questionnaires relevant to your organisation.

Please respond either via Bravo or e-mail to simon.logan@southernwater.co.uk by 17:00 on 9th April 2021.
