C67341

II.1.2) Main CPV code

- 44613400 - Storage containers

II.1.3) Type of contract

Supplies

II.1.4) Short description

Thermal boxes for the transportation of organs.

II.1.5) Estimated total value

Value excluding VAT: £150,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 79920000 - Packaging and related services

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

NHSBT holds contracts for provision of consumables used in the retrieval of human organs for transplantation. We are seeking interest from potential suppliers of organ transport boxes, with a view to commencing a formal procurement process.

These boxes are used with wet ice to cool and maintain the temperature of the organ, and to protect the organ in transit. The organ is packaged in fluid and triple-bagged before

being surrounded by the ice in the box. The boxes are then used to safely transport the organ from the donor hospital to the transplant centre.

Prior to commencing a formal procurement process, NHSBT wishes to engage with suppliers who are experienced in manufacturing/supplying containers, although a history of providing containers for medical use is not essential.

Should any containers meet the core requirements of the specification as described below, specialist validation will be undertaken by NHSBT to ensure the containers are safe to use.

Small Container:

- UKCA Mark for Medical Devices (formerly CE Mark Class IIa)
- Internal capacity 12-18 litres
- Weight when packed with ice
