Scope

Description

The enabling works consist of the installation of new below ground utility ducting; new fire water pipework; new fire hydrants; and new drainage pipework along with associated access chambers. Additionally, existing electrical services and equipment will be diverted/relocated including an existing feeder pillar; an electric vehicle charger; supplies for existing yard lighting; and other small power supply requirements. To facilitate this, demolition and removal of existing yard areas will be required; excavation for the installation of the above services; and the reinstatement of new yard finishes. It is intended that the enabling works commence in April 2026 for a duration of 3 months.

Civil works required include:

- Installation of new utility ducting and chambers
- Removal/diversion of existing electrical supplies including feeder pillars, EV charger etc.
- Installation of HV cabling
- Installation of Earthworks and heavy duty pavement

- Installation of new surface water drainage pipework
- Installation of new fire hydrants and pipework
