## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

CP2116-21 Deletti Electric Vehicle Charge Points Phase 2 (ORCS) in Various Locations in Devon and Torbay

Reference number

DN562733

#### **II.1.2) Main CPV code**

- 65300000 - Electricity distribution and related services

#### **II.1.3) Type of contract**

Services

#### **II.1.4) Short description**

DELETTI (DEvon Low carbon Energy and Transport Technology Innovator) is a European Regional Development Fund (ERDF) part-funded programme that aims to continue the low

carbon transport and energy transformation, through the expansion of electric vehicle charge points (EVCPs), solar carports and developing new, local energy models.

This is the procurement for phase 2 of the DELETTI charge points project. The capital costs

of Phase 2 are funded by the UK government's the On-street Residential Charge point Scheme (ORCS).

## Description of the procurement

Instead of

Text

Devon County Council (DCC) require support relating to Electric Vehicle Charging Points (EVCPs) and associated infrastructure and services.

This procurement will deliver 39 EV charge points in public car parks across Devon and Torbay. Car parks are owned by the Devon District, Borough, and Parish Councils and Torbay

Council. DCC will procure a Private Sector Partner (PSP) to design, build, operate and maintain charge points through a concessions agreement.

The PSP will be provided with a contribution towards costs (£6,500 per site) from OZEVs On-street Residential Charge point Scheme (ORCS), with the intention for the landowner to own

the grid connection and ducting to the charging point at the end of the contract period.

A template concessions agreement and lease developed for this phase 2 of the Devon Low

Carbon Energy & Transport Technology Innovator (DELETTI) charge points project will be used.

DELETTI is a European Regional Development Fund (ERDF) part-funded programme that

aims to continue the low carbon transport and energy transformation, through the expansion

of EVCPs, solar carports and developing new, local energy models.
