It is envisaged that this arrangement will be on a short term basis whilst the wider strategy and new procurement process is undertaken.

Currently the NIHE has a significant number of MAPDs to be completed. It is intended that each region will package together a number of projects consisting of 2/3/4 properties, based on geographically location. These packages will become standalone contracts using, typically, NEC3 ECSC for major adaptations. It is intended to to run a Pre-qualification competition using a restricted procedure approach containing the details of the packages. Economic Operators will have the opportunity as part of their completion of the PQQ submission to identify the 'Packages' they then wish to participate in a secondary competition should they successfully meet the Pre-qualification questionnaire criteria.
