- Safe, effective solutions.
- Create a consistent programme which can be overseen by a single Training Programme Director (TPD).

The solution will deliver training that is regarded professionally as best practice, evidence-based care and supporting future ways of working: better for patients, core trainees, environment and better utilisation of the HEE pound.

HEE M&E requires that any proposed solution(s), works seamlessly together with the existing systems and partner organisations where clinical hands-on sessions are required.

4. Detailed Requirements

The core training programme accommodates up to 180 core trainees (DCT) in any one year. The successful programme must be able to support 120 of the DCTs using a blended approach of virtual learning, hosted by the HEE virtual learning environment (VLE), and hands-on elements. The VLE mitigates against any information governance issues as the environment is managed by HEE and does not require the provider to know any contact details for the FDs or their supporting Educational Supervisors or TPDs.
