I.2) Information about joint procurement

The contract is awarded by a central purchasing body

I.4) Type of the contracting authority

Ministry or any other national or federal authority

I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Supply of Energy 2

Reference number

RM6251

II.1.2) Main CPV code

• 71314000 - Energy and related services

II.1.3) Type of contract

Services

II.1.4) Short description

This framework agreement will act as the vehicle through which central government and wider public sector customers will be supplied gas and electricity. The portfolio varies on an annual basis but our current best estimates are that the framework agreement will supply approximately 25 TWh per year of gas and electricity to approximately 1,150 public sector customers across approximately 86,000 meters.

In supplying gas and electricity the supplier will provide customers with various supply administration services covering invoicing, query resolution and account management, as well as a range of services which will support customers in their net zero ambitions such as access to energy from renewable sources and to Power Purchase Agreements. The supplier will also support the delivery and execution of Crown Commercial Service's energy trading requirements.

The portfolio will include a range of customers from different sectors, and a range of different metering classes and profiles e.g. half hourly, non-half hourly, unmetered and BMU's. A detailed list of meters will be published in a Portfolio Summary.

This new framework agreement has replaced the existing Supply of Energy framework agreement (RM6011). Baskets of customers meters will transfer to the new framework agreement at different times over a twenty four month period between April 2024 and April 2026. It is CCS intention (although cannot be guaranteed) that each basket will be supplied through this framework agreement for a four year period. CCS will engage with the incoming and outgoing suppliers to coordinate the transfer.

In addition to the transfer of baskets it is possible that a small number of meters might require supply through this new agreement prior to April 2024.

II.1.6) Information about lots

This contract is divided into lots: Yes

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £51,000,000,000

- 72300000 Data services
- 72310000 Data-processing services

II.2.3) Place of performance

NUTS codes

• UK - United Kingdom

II.2.4) Description of the procurement

Crown Commercial Service (CCS), as the Contracting Authority, has put in place a framework agreement for the supply of approximately 13 TWh of electricity to meet requirements of 990 customers across c.53,000 meters managed via an aggregated, flexible, risk managed approach. The requirement covers all electricity meters.

Growth in customer numbers could cause a rise in demand. Conversely, any energy demand destruction/ efficiency initiatives could reduce the figure over the life of the relationship. Existing volumes will be expected to transfer in stages as supply delivery periods (under the existing arrangement) expire and therefore initial delivery volumes may be significantly lower. Provision of goods, works and services in addition to the provision of electricity and gas supplies may also be required.

It is envisaged that this will include, but not be limited to a wide range of procurement options and which allow for the greatest degree of control and transparency of pricing; direct access to trading service and access to Financial Services Authority regulated advisors; price to market options; flexible and electronic billing systems; sourcing of longer term price mechanisms (potentially acting as Agent); customer administration and query management, including site registrations, objection handling and ongoing maintenance of

customer contracts; bespoke report generation; transparent balancing and settlement charges; new connections and site-works; metering; demand side management and innovations delivering energy savings; Automatic Meter Reading; Energy/Carbon reduction/management advice and guidance and implementation of recommendations (which may include sourcing of third- party services/technology); Export Agreements and Balancing Services, peer to peer (P2P) energy trading platform.

II.2.5) Award criteria

Quality criterion - Name: Quality / Weighting: 70

Cost criterion - Name: Price / Weighting: 30

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

II.2) Description

II.2.3) Place of performance

NUTS codes

• UK - United Kingdom

II.2.4) Description of the procurement

Crown Commercial Service (CCS), as the Contracting Authority, has put in place a framework

agreement for the supply of approximately 12 TWh of gas to meet requirements of 1005 customers

across c.24,000 meters managed via an aggregated, flexible, risk managed approach.

The requirement covers all gas meters.

Growth in customer numbers could cause a rise in demand. Conversely, any energy demand

destruction/ efficiency initiatives could reduce the figure over the life of the relationship.

Existing volumes will be expected to transfer in stages as supply delivery periods (under the existing

arrangement) expire and therefore initial delivery volumes may be significantly lower.

Provision of goods, works and services in addition to the provision of electricity and gas supplies may

also be required.

It is envisaged that this will include, but not be limited to a wide range of procurement options and

which allow for the greatest degree of control and transparency of pricing; direct access to trading

service and access to Financial Services Authority regulated advisors; price to market

options; flexible

and electronic billing systems; sourcing of longer term price mechanisms (potentially acting as

Agent); customer administration and query management, including site registrations, objection

handling and ongoing maintenance of customer contracts; bespoke report generation; transparent

balancing and settlement charges; new connections and site-works; metering; demand side

management and innovations delivering energy savings; Automatic Meter Reading; Energy/Carbon

reduction/management advice and guidance and implementation of recommendations (which may

include sourcing of third- party services/technology); Export Agreements and Balancing Services,

peer to peer (P2P) energy trading platform.

Quality criterion - Name: Quality / Weighting: 70

Cost criterion - Name: Price / Weighting: 30

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Restricted procedure

IV.1.3) Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

IV.2) Administrative information

IV.2.1) Previous publication concerning this procedure

Notice number: 2022/S 000-026408

IV.2.9) Information about termination of call for competition in the form of a prior information notice

The contracting authority will not award any further contracts based on the above prior information notice

Section V. Award of contract

Lot No

1

A contract/lot is awarded: Yes

V.2) Award of contract

V.2.1) Date of conclusion of the contract

7 February 2023

V.2.2) Information about tenders

Number of tenders received: 2

Number of tenders received by electronic means: 2

The contract has been awarded to a group of economic operators: No

V.2.3) Name and address of the contractor

See Contracts Finder Notice for full supplier list

- 4) Transparency Agenda

On 02/04/2014, Government introduced its Government Security Classifications (GSC) scheme which replaced Government Protective Marking Scheme (GPMS). A key aspect is the reduction in the number of security classifications used. All bidders were required to make themselves aware of the changes as it may impact this requirement. This link provides information on the GSC at:

https://www.gov.uk/government/publications/government-security-classifications

Cyber Essentials is a mandatory requirement for Central Government contracts which involve handling personal information or provide certain ICT products/services. Government is taking steps to reduce the levels of cyber security risk in its supply chain through the Cyber Essentials scheme. The scheme defines a set of controls which, when implemented, will provide organisations with basic protection from the most prevalent forms of threat coming from the internet. To participate in this procurement, bidders were required to demonstrate they comply with the technical requirements prescribed by Cyber Essentials, for services under and in connection with this procurement.

Places Awarded per Lot:

Lot 1 - Electricity Lot - 1

Lot 2 - Gas Lot - 1
