Scope

Reference

T/RAF121/25

Description

UKAEA are looking to engage a Supervisory Control And Data Acquisition (SCADA) specialist to develop a new SCADA system in J5 based on the IEC 61850 protocol, replacing the existing SCADA. The work includes the design, manufacture, delivery, installation, and commissioning of the complete system, including an operator workstation in J5 control room. The SCADA will provide full control authority in J5 and D8, with intelligent interlocking to prevent failures or operational errors. The system will integrate with all numerical and auxiliary devices, transmitting all alarms, trip signals, and status indications over fibre or Ethernet to the main control room. A GPS-synchronized clock will ensure accurate system timing. Additionally, a rugged firewall will be implemented to protect the system against cyber threats, ensuring secure and reliable operation.

Total value (estimated)

- £400,000 excluding VAT
- £480,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 1 April 2026 to 31 March 2032
- 6 years

Main procurement category

Goods

CPV classifications

- 42961200 - Scada or equivalent system

Contract locations

- UKJ14 - Oxfordshire

Participation

Legal and financial capacity conditions of participation

Cyber Essentials

Particular suitability

Small and medium-sized enterprises (SME)

Submission

Enquiry deadline

4 February 2026, 12:00pm

Tender submission deadline

23 February 2026, 12:00pm

Submission address and any special instructions
