II.2.4) Description of the procurement

In March 2021, the UK Government announced an ambition to deliver nationwide gigabit-capable broadband infrastructure, recognising that there is a need for government intervention in the parts of the country that are not commercially viable. They have committed a total of 5 billion GBP to ensure that all areas of the UK can benefit. This will be spent through a package of coordinated and mutually supportive interventions, collectively known as Project Gigabit, with an initial intervention of 1.2 billion GBP targeting at least 85% gigabit coverage of the UK by 2025 and nationwide gigabit-capable broadband infrastructure by 2030.

As part of Project Gigabit, the Scottish Government is working with Building Digital UK (BDUK) to deliver contracts to suppliers delivering gigabit-capable wholesale infrastructure in Scotland. This procurement approach will be a successor to the Digital Scotland Superfast Broadband programme and work in parallel with the Scottish Government's current Reaching 100% (R100) programme.

This contract award is for the Borders and East Lothian Area and was tendered through BDUK's Project Gigabit procurement dynamic purchasing system (DPS).
