II.1.4) Short description

Pre-Construction Services for the purposes of delivering the Design and Construction of the HAP Regeneration Scheme as well as Early Works to enable this development. Principal Contractor and Principal Designer services as defined in the Building Safety Act 2022 will both be a requirement of the PCSA and the Development Agreement.

The scheme consists of 407 residential units and a community building with construction over 2 phases, with Phase 1 delivering 109 affordable homes and the 3 storey community building. The remaining 298 residential units will be delivered in Phase 2 together with the one storey community building extension. The scheme will incorporate 64 replacement homes comprising 28 existing resident leaseholder properties (as shared equity units) and 36 secure tenant properties. The 111 affordable units to be provided across both phases will include 20 shared ownership units with the remaining the 232 units for private sale.

The scheme would be phased to enable the existing residents (resident leaseholders and secure tenants) to move only once as part of an agreed decant strategy and without a need to temporarily move off-site.

The proposed development model of council finance/contribution for the delivery of the affordable units and funding of the private sale units by the developer partner will spread the financial outlay and risk of all parties and guarantee the deliverability of the project.

As Phase 1 is delivering 100% affordable homes, the Council will be paying all costs to the selected Developer on a monthly basis under an Open Book Contract. In Phase 2, any contributions agreed by the Council to be paid to the developer to meet the costs of the remaining

affordable units will be paid by the Council on a rolling basis, in accordance with certified valuations of work undertaken or agreed stage payments for delivering the affordable homes.

The Construction value is currently estimated at c. £156m. However, this will not be the anticipated Contract Value.

II.1.5) Estimated total value

Value excluding VAT: £35,000,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UKI42 - Tower Hamlets

II.2.4) Description of the procurement

The procurement route for the HAP Regeneration Scheme will be a two-stage procurement process using the Open Procedure. The Council requires the PAS 91 Questionnaire and the ITT be submitted simultaneously. The four top scoring bidders at the PAS 91 Questionnaire stage will then have their ITT scored.

The relationship between the Council and the developer is governed by the PCSA (stage 1). At the same time as carrying out the pre-construction services including early works, the Council and the developer will agree the outstanding terms of the Development Agreement and building contract with a view to appointing the developer to carry out the main works for the project (stage2).

The evaluation criteria and methodology for evaluation will be published in the PAS 91 Questionnaire and ITT documents. The high-level evaluation weightings of the ITT will be

50% quality, 10% social value and 40% price.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months
