### **Scope**

### **Reference**

T1184

### **Description**

Please access the opportunity via <https://supplierlive.proactisp2p.com/Account/Login>

Understanding Society: the UK Household Longitudinal Study (UKHLS) is a longitudinal social survey of households and individuals living in the UK. Data collection began in January 2009 and participants are interviewed annually. In Waves 2 and 3 of the Study (2010-13) a wide range of objective health measures were collected via a nurse visit, including venous blood samples from which we produced a range of analytes, extracted DNA and produced genetic and epigenetic data. A similar exercise is being undertaken at Wave 16 (2024-26), where the nurse visit has been replaced by participants collecting samples/measurements themselves.

This contract covers the data collection and analysis for a further bio-data collection on the Study's Innovation Panel (2027) ahead of a potential roll out on the main Study sample at Wave 22 (2030-32). The Study is designed and managed by the Institute for

Social and Economic Research (ISER) at the University of Essex ("the University").

### **Total value (estimated)**

- £1,125,000 excluding VAT
- £1,350,000 including VAT

Above the relevant threshold

### **Contract dates (estimated)**

- 14 May 2026 to 30 April 2028
- Possible extension to 30 April 2032
- 5 years, 11 months, 18 days

Description of possible extension:

Initial 2 year contract basis with the ability to extend for a further 4 years (a 1-year pilot and a 3-year main survey rollout) (2+1+3).
