Quality and innovation - All services need to be of high quality and innovation is needed to maintain services at the highest level. Integration, collaboration and service sustainability- The dental provider needs to be able to integrate and collaborate with the healthcare provider and the secure estate operator. The service needs to demonstrate sustainability. The provider worked and will work collaboratively with the healthcare provider and the prison. The service has been sustainable and is considered sustainable going forward.

Improving access, reducing health inequalities and facilitating choice - This was considered of high importance due to the patient population and demographics. The access times for the services are within national targets or regional averages.
