Description

Northumbria University intends to directly award a contract for the supply, delivery, and installation of a BMG Labtech CLARIOstar® Plus multi-mode microplate reader to support research for Project 1220794: Sustainable Styles.

The procurement covers a specialized analytical system equipped with patented Linear Variable Filter (LVF) Monochromators™ and Enhanced Dynamic Range (EDR) technology. This specific model is required to ensure complete technical and data interoperability with existing established research protocols and identical hardware utilized by lead project partners. The scope includes the proprietary MARS Data Analysis Software and on-site technical training to ensure compliance with the funder's high-throughput data reproducibility standards.
