United Kingdom

NUTS code

UKM92 - Dumfries & Galloway

Internet address(es)

Main address

<http://www.dumgal.gov.uk>

Buyer's address

https://www.publiccontractsscotland.gov.uk/search/Search_AuthProfile.aspx?ID=AA00219

I.4) Type of the contracting authority

Regional or local authority

I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

HWRC Waste Streams & Contingency Requirements

Reference number

DGCC-00357

II.1.2) Main CPV code

- 90514000 - Refuse recycling services

II.1.3) Type of contract

Services

II.1.4) Short description

Dumfries and Galloway Council's Waste Service is seeking to appoint suitably licenced service providers to receive, treat, and/or dispose a number of waste streams with a view to managing the waste in accordance with the waste hierarchy.

II.1.6) Information about lots

This contract is divided into lots: Yes

II.2) Description

II.2.1) Title

Lot 8a – Dewatered Gully Waste (east)

Lot No

16

II.2.2) Additional CPV code(s)

- 90500000 - Refuse and waste related services
- 90513000 - Non-hazardous refuse and waste treatment and disposal services

- 90514000 - Refuse recycling services
- 90513100 - Household-refuse disposal services

II.2.3) Place of performance

NUTS codes

- UKM92 - Dumfries & Galloway

Main site or place of performance

Within the Dumfries and Galloway region of Scotland, the “Lochar-Moss MBT facility” is located on Lockerbie Road.

II.2.4) Description of the procurement

This Lot is seeking the provision of a suitably permitted or licensed waste facility to receive Dewatered Gully Waste. Upon receipt of the waste the Service Provider must ensure that it is stored, transported, treated and disposed of properly and in accordance with all applicable laws, permissions, consents, licenses, permits and the waste duty of care requirements. Treatment options offered should be as far up the waste hierarchy as possible. DGC’s Dewatered Gully Waste – i.e., the solids left after the water is drained off of the waste material that has been sucked out of roadside drains by a street sweeping vehicle – are anticipated to include a mixture of sand, grit, metal and organics. It is estimated there will be approximately 60-75% sand & aggregate and 25-40% organic material (e.g., leaves, twigs & litter etc.). The materials will be likely to include: 0-15mm gully arisings and 16-40mm gully arisings. This material is likely to require treatment to remove inert fractions, or fractions capable of treatment to allow diversion from landfill. DGC dewatering our Gully Waste is a new process, so the anticipated make-up of this waste material is estimated based on feedback from industry and other local authorities.

This Lot will be collected by the winning bidder in their own (or a suitably qualified sub-contractor’s) vehicle from the Dumfries MBT plant. Provision of a skip container by the winning bidder is required for this lot. However, as this is a new waste material for DGC, we are open to suggestions for the best way to transport this waste to the winning bidders Nominated Facility.

(EWC 19 08 05)

II.2.5) Award criteria

Quality criterion - Name: Quality / Weighting: 40

Price - Weighting: 60

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

II.2) Description

II.2.1) Title

Lot 8b – Dewatered Gully Waste (west)

Lot No

17

II.2.2) Additional CPV code(s)

- 90500000 - Refuse and waste related services
- 90513000 - Non-hazardous refuse and waste treatment and disposal services
- 90514000 - Refuse recycling services
- 90513100 - Household-refuse disposal services

II.2.3) Place of performance

NUTS codes

- UKM92 - Dumfries & Galloway

Main site or place of performance

Within the Dumfries and Galloway region of Scotland, the “Stranraer Zero Waste Park” is located in Blackparks Industrial Estate.

II.2.4) Description of the procurement

This Lot is seeking the provision of a suitably permitted or licensed waste facility to receive Dewatered Gully Waste. Upon receipt of the waste the Service Provider must ensure that it is stored, transported, treated and disposed of properly and in accordance with all applicable laws, permissions, consents, licenses, permits and the waste duty of care requirements. Treatment options offered should be as far up the waste hierarchy as

possible. DGC's Dewatered Gully Waste – i.e., the solids left after the water is drained off of the waste material that has been sucked out of roadside drains by a street sweeping vehicle – are anticipated to include a mixture of sand, grit, metal and organics. It is estimated there will be approximately 60-75% sand & aggregate and 25-40% organic material (e.g., leaves, twigs & litter etc.). The materials will be likely to include: 0-15mm gully arisings and 16-40mm gully arisings. This material is likely to require treatment to remove inert fractions, or fractions capable of treatment to allow diversion from landfill. DGC dewatering our Gully Waste is a new process, so the anticipated make-up of this waste material is estimated based on feedback from industry and other local authorities.

This Lot will be collected by the winning bidder in their own (or a suitably qualified sub-contractor's) vehicle from the SZWP. Provision of a skip container by the winning bidder is required for this lot. However, as this is a new waste material for DGC, we are open to suggestions for the best way to transport this waste to the winning bidders Nominated Facility.
