Scope

Reference

2025 Pocklington Canal Water Quality Survey

Description

The aim of this contract is to undertake a comprehensive water quality survey of the Canal by sampling from historic and other strategic locations between April 2025 and March 2026 in order to be in a position to assess SSSI condition against the SSSI monitoring specification . A number of on-site parameters will be recorded and chemical analysis undertaken of water samples. Analysis is likely to involve a combination handheld meters and laboratory analysis. An evaluation of the results should be undertaken against the SSSI monitoring specification.
