Notice identifier: 2026/S 000-007958

Procurement identifier (OCID): ocds-h6vhtk-052c44 ([view related notices](#))

Published 29 January 2026, 11:32am

### Scope

### Reference

PRC149

### Description

Background:

Despite the size of this facility more useable space is still required. The Authority is currently struggling to accommodate all of the materials it is receiving and processing, and the current site layout does not allow for any potentially additional materials, such as plastic film, which is likely to be introduced in the future, in line with WG policy.

One small piece of land just inside the perimeter of the site was recently highlighted by the authority as having potential for equipment storage and this has now been concreted. However, this piece of land may also be suitable for further expansion with a view to building a roofed structure which could potential house one or more material storage bays.

The objectives of this work are:

CAD and .pdf drawings are to be produced showing all potential structure designs.

The findings are then to be brought together into a report which will be shared with the Local Authority for comment and discussion with WRAP.

---

## **Lot Lot 2. Local Authority Recycling and Waste Management Service Implementation and Roll-Out**

### **Description**

Lot 2 covers the provision of advice to local authorities in England, Northern Ireland and Wales on the implementation and roll out of recycling and waste management services either directly by the local authority or with a contractor. The services to be covered include:

- collections of dry recycling, food waste, garden waste and residual waste from household and business premises,
- Household Waste Recycling Centres (HWRCs),
- materials handling and sorting facilities,
- any other emerging services.

The advice provided by WRAP will be in support of the policy priorities within each of the nations. This work will involve supporting the identified local authority to gain a full understanding of the changes planned and the actions required to implement those changes; liaising with key officers to support and develop a detailed mobilisation plan which will cover all all-key works streams associated with the service change; and support to identify, monitor, manage and mitigate any high risks to the project and overall implementation support to roll out the service change.

## **Contract 5. Denbighshire County Council Waste Transfer Station Improvements**

### **Lots**

Lot Lot 2. Local Authority Recycling and Waste Management Service Implementation and Roll-Out

### **Supplier**

- SLR CONSULTING LIMITED
