II.1.4) Short description

The University is inviting tenders on the terms set out in this ITT for the supply, delivery and installation of an Automated Synthesis System. We seek a system for automated high throughput synthesis and preparation of high value-added chemical compounds and mixtures. The system will be capable of carrying out multiple experiments, using automated gravimetric and volumetric dosing, automated mixing and temperature control to provide to maximise productivity and reproducibility. The system will be used by the ERDF funded project "Innovate using next generation Chemistry (NextGenChem)", as a Robotics - Automation Platform. The location of the site is Bailrigg Campus, Lancaster, LA1 4YW.
