Public Transport Data Management System

#### II.1.2) Main CPV code

• 72220000 - Systems and technical consultancy services

#### II.1.3) Type of contract

Services

#### II.1.4) Short description

The West Yorkshire Combined Authority (the CA) is seeking a single supplier or consortium of suppliers to provide a new public transport data management system to replace its current existing single system.

The core purpose of the Public Transport Data Management System for the CA is to act as a single data hub for public transport information. In this function, it is not an isolated service but rather exists as part of a wider ecosystem in a range of interconnected services that support each other. In their entirety, they support the business processes that deliver the organisation's objectives and must work together to achieve such delivery. From its initial conception and specification of requirements, the data flows and processes in the wider ecosystem have shaped and influenced the design and development of the current system throughout its life.
