## **Section II: Object**

### II.1) Scope of the procurement

### II.1.1) Title

London Rail Infrastructure Improvement Framework

Reference number

DN465077

### II.1.2) Main CPV code

• 45234100 - Railway construction works

### II.1.3) Type of contract

Works

### II.1.4) Short description

This is a Contract Award Notification for the award of the London Rail Infrastructure Improvement Framework. The Framework is designed to deliver major and minor infrastructure improvement works on Transport for London (TfL) and Network Rail Managed Infrastructure (NRMI).

The Framework is made up of two lots, Lot 1.1 for Minor Infrastructure Improvement works and Lot 1.2 for Major Infrastructure Improvement works

This framework will be Rail for London Ltd (Part of the TfL Group of Companies and made up of London Overground, Trams and DLR) primary means of undertaking infrastructure improvement works for the term of the framework agreement. While primarily for Rail for London Ltd this framework can be utilised all TfL Group Companies including London Underground Limited and Crossrail for railway infrastructure improvement works.

### II.1.6) Information about lots

This contract is divided into lots: Yes

## II.2) Description

### II.2.1) Title

Minor Infrastructure Improvement

#### Lot No

#### 1.1

### II.2.2) Additional CPV code(s)

- 32500000 Telecommunications equipment and supplies
- 34632300 Electrical installations for railways
- 34946000 Railway-track construction materials and supplies
- 42500000 Cooling and ventilation equipment
- 45111000 Demolition, site preparation and clearance work
- 45213320 Construction work for buildings relating to railway transport
- 45213321 Railway station construction work
- 45221112 Railway bridge construction work
- 45233251 Resurfacing works
- 45234112 Railway depot construction work
- 45234115 Railway signalling works
- 45313000 Lift and escalator installation work
- 45315400 High voltage installation work
- 45331000 Heating, ventilation and air-conditioning installation work
- 45340000 Fencing, railing and safety equipment installation work
- 50220000 Repair, maintenance and associated services related to railways and other equipment
- 71220000 Architectural design services
- 71311000 Civil engineering consultancy services
- 71315300 Building surveying services
- 71320000 Engineering design services
- 71351500 Ground investigation services
- 71353200 Dimensional surveying services

- 71355000 Surveying services
- 71631470 Railway-track inspection services
- 90491000 Sewer survey services

### II.2.3) Place of performance

**NUTS** codes

• UKI - London

### II.2.4) Description of the procurement

Lot 1.1: Minor infrastructure improvement for works valued between GBP 0 - GBP 4,000,000.00

The successful 3 economic operators awarded a framework agreement for this lot have the capability to design, procure, install/modify, execute, test and commission and handover into maintenance the following packages of works/services identified below:

Design: The successful economic operators have the capability to provide multidisciplinary designs throughout the life cycle of a project. This will include (but is not limited to) fulfilling early design development including feasibility, option selection and single option development and detailed design. Works: Civil and premises — including modification of existing railway stations, route wide civils structures, Station platforms, Railway depots, ancillary buildings.

Works: Telecommunications — line-side and railway control systems, radio systems, antenna's, information and security systems, CCTV, access control, PA systems, customer information systems, public help point systems, passenger emergency points, telephone systems, data networks and Scada systems. Works: Fire detection and prevention systems — Fire detection, warning systems and integration into new and/ or existing systems, fire suppression systems, smoke ventilation systems, fire separation, compartmentalisation and structural fire protection, fire safety management controls. Works: Low voltage mechanical, electrical and power installations/renewal for railway stations, station platforms, railway depots and ancillary buildings. Works: High voltage mechanical, electrical and traction power (Track) including points and conductor rail heating systems, high voltage transformers, rectifiers and HV cabling, UPS, line side lighting, earthing and bonding, EMC verification, signalling power supply.

Works: Overhead line equipment (OHLE) and direct current (DC) — including design, installation and commissioning of OHLE and DC systems. Works: Signalling — including installation of TPWS systems, signalling commission systems, line side indicators, signalling control systems. Works: Track — the installation of track on all TfL infrastructure (i.e. heavy rail, light rail and trams). Works: Station lifts and escalators — including design,

Installation, modification and commissioning and asset hand back.

### II.2.11) Information about options

Options: Yes

Description of options

The duration of the framework agreement shall be 7 years. The initial term of the framework will be 5 years which can be extended at the discretion of TfL by a further 2 years in 12 month intervals.

### II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

## **Section VI. Complementary information**

## VI.3) Additional information

The procurement was conducted on behalf of Transport for London (TfL) under the Utilities Contracts Regulations 2016 under the negotiated procedure with prior call for competition.

TfL operates as a functional body of the Greater London Authority under the direction of the Mayor of London.

## VI.4) Procedures for review

### VI.4.1) Review body

**HM Courts and Tribunals Service** 

Royal Courts of Justice, The Strand

London

Email

Enquiries.centrallondon.countycourt@justice.gov.uk

Country

**United Kingdom** 

### VI.4.3) Review procedure

Precise information on deadline(s) for review procedures

TfL observed a standstill period for a minimum of 10 calendar days from when the contract award decision was notified to Contractors. That notification provided full information on the award decision. The standstill period provided time for unsuccessful Contractors to challenge the award decision before the framework agreements were entered into.
