715112450 - Ballistic Testing Services - Personal Armour

Defence Equipment and Support

UK4: Tender notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2026/S 000-008118

Procurement identifier (OCID): ocds-h6vhtk-056c18 ([view related notices](#))

Published 29 January 2026, 2:50pm

Scope

Description

This Tender Notice outlines the Authority's intent to competitively assess, select and award a contract to deliver Ballistic Testing Services for Personal Armour to support new to service projects and ensure through life support of Personal Armour provided to its Armed Forces Personnel.

The contract will have a headroom of £10m (Inc VAT) and will be for 5 years with 3 x 1 optional years.

The Ballistic Testing Service will serve as a dedicated platform to facilitate comprehensive testing and evaluation of Personal Armour systems. This service will encompass a wide range of protective equipment, including but not limited to Hard Armour Plates, Soft Armour Fillers, and Helmets. The testing process will ensure that these protective solutions meet established safety, durability, and performance standards under various conditions. By providing a structured and reliable pathway for ballistic testing, the service aims to support the development, validation, and certification of personal protective equipment, ensuring it meets operational requirements and offers optimal protection to users in diverse environments.

For the provision of Ballistic Testing Services, it is a mandatory requirement that the contractor operates a facility located within the United Kingdom. This ensures

accessibility, compliance with relevant UK regulations, and alignment with national security and operational standards. The ballistic testing will be conducted on an as-needed basis throughout the duration of the contract, with testing schedules determined by specific requirements or requests. The contractor must maintain readiness and flexibility to accommodate testing demands at any point during the contract period, ensuring timely and efficient service delivery to meet the needs of the programme.

The Ballistic Testing Service competition mandates that participating laboratories must hold accreditation from the United Kingdom Accreditation Service (UKAS) to the ISO 17025 standard. This international standard specifies the general requirements for the competence, impartiality, and consistent operation of testing and calibration laboratories, ensuring the highest levels of quality and reliability in testing processes. Additionally, laboratories must demonstrate compliance with NATO AEP-2920, the Allied Engineering Publication that outlines the procedures and standards for evaluating the ballistic performance of personal armour systems. This dual requirement ensures that laboratories possess both the technical expertise and the operational capability to conduct ballistic testing to internationally recognised and NATO-specific standards, guaranteeing the accuracy, consistency, and credibility of the results.

The competitive procurement will be managed in accordance with the Procurement Regulations 2024.

Total value (estimated)

- £8,333,333.33 excluding VAT
- £10,000,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 29 July 2026 to 1 May 2031
- Possible extension to 1 May 2034
- 7 years, 9 months, 4 days

Description of possible extension:

Option 1: 5 Year Duration

Option 2: 5 Years (+1, +1, +1) these options can be taken in any combination (e.g. 1+1, 2+1, 1+2)

Options

The right to additional purchases while the contract is valid.

The Authority may procure repeated Ballistic test services
