- 66000000 - Financial and insurance services

II.1.3) Type of contract

Services

II.1.4) Short description

MRRS is designed as a grant administration service delivered through a Digital Platform. At a high level, MRRS shall invite Applicants to create an account and apply for a building to be remediated through the service's Digital Platform. The building's Eligibility shall then be assessed by the Supplier, and if it passes the requirements shall be brought within the scope of MRRS. Applicants shall then be required to compile a Work Package, or a plan of remediation works, including the costs and timescales of the work required to remediate the fire safety risk of the building. This Work Package shall be reviewed by the Supplier, and if it passes requirements the Applicant shall be authorised for grant funding in line with the terms of a signed Grant Agreement. The Applicant shall be given an initial payment with which they are required to begin remediation works, and thereafter must submit monthly Progress Reports of the work completed to date and what work is projected to be completed in the future, including any Cost Variations to the terms of the Grant Agreement. The monthly Progress Reports shall be reviewed by the Supplier, and if they pass the requirements shall trigger further incremental grant payments up to the point of completion of the works and submission of the final monthly Progress Report. For the final monthly Progress Report, the Applicant shall be required to submit a detailed breakdown of the remediation work completed along with a suite of final documentation. The Supplier shall review the final Progress Report in line with the data held on file for that Application, and if it passes the requirements the Supplier shall authorise the final payment to the Applicant. Throughout the process, the Supplier shall handle any Complaints, Appeals, Escalations and General Enquiries from the Applicant via a telephony and electronic communications service. Furthermore, the Supplier shall escalate specific matters to The Agency and the other Delivery Partners where it is

appropriate to do, as outlined in the requirements below. Regarding payments, the Supplier shall be required to authorise all payments, whilst The Agency will retain the requirement to validate recipients and make those authorised payments.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £7,800,000
