VII.2) Information about modifications

VII.2.1) Description of the modifications

Nature and extent of the modifications (with indication of possible earlier changes to the contract):

The basis of the modification is that the supply of service remains necessary to meet the needs of people and carers living with

younger-onset dementia; and because there is an opportunity to make an efficiency saving which would carry significant risks if managed at the same time as a change of contractor.

VII.2.2) Reasons for modification

Need for additional works, services or supplies by the original contractor/concessionaire.

Description of the economic or technical reasons and the inconvenience or duplication of cost preventing a change of contractor:

Under Regulation 72(1)(b) of the PCRs, contracts and framework agreements may be modified without a new procurement procedure, in certain circumstances, when provision of

a service is necessary and was not included in the initial procurement; and where a change of contractor would cause significant inconvenience or substantial duplication of costs. Any

modification under this provision must also be below 50% of the original contract value. It is proposed that the current situation meets these requirements for the following reasons:

i. The value of the contract from January 2018-September 2025 is a total of £2,350,033. Therefore the proposed modification, which would add £439,032 to the total value, represents an additional 18.7% over and above the current contract value.

This is well below the 50% threshold described in the relevant regulation.

VII.2.3) Increase in price

Updated total contract value before the modifications (taking into account possible earlier contract modifications, price adaptations and average inflation)

Value excluding VAT: £2,350,033

Total contract value after the modifications

Value excluding VAT: £2,789,065
