<http://www.scotland.gov.uk>

Buyer's address

[https://www.publiccontractsscotland.gov.uk/search/Search\\_AuthProfile.aspx?ID=AA10482](https://www.publiccontractsscotland.gov.uk/search/Search_AuthProfile.aspx?ID=AA10482)

**I.2) Information about joint procurement**

The contract is awarded by a central purchasing body

**I.4) Type of the contracting authority**

Ministry or any other national or federal authority

**I.5) Main activity**

General public services

---

## Section II: Object

### II.1) Scope of the procurement

#### II.1.1) Title

CivTech 8.4 -How can technology help us better assess and identify projects and opportunities that will improve and increase investment in Scotland's marine natural capital?

#### II.1.2) Main CPV code

- 72000000 - IT services: consulting, software development, Internet and support

#### II.1.3) Type of contract

Services

#### II.1.4) Short description

In common with other coastal nations across the globe, a huge part of Scotland's Natural Capital, and our opportunities to develop nature based solutions to help meet net-zero goals and support wider biodiversity, is located within the marine environment. However decision makers both in Scotland and further afield, lack the information required to identify the optimum locations for projects to invest in. We will invest in the development of new technologies that will support decision makers in the identification of optimum locations for marine Natural Capital projects as well help estimate and monitor their impacts.

<https://www.civtech.scot/how-to-apply-civtech-8>

#### II.1.6) Information about lots

This contract is divided into lots: No

#### II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £615,000

## **II.2) Description**

### **II.2.2) Additional CPV code(s)**

- 90720000 - Environmental protection
- 90733300 - Surface water pollution protection services

### **II.2.3) Place of performance**

NUTS codes

- UKM - Scotland

### **II.2.4) Description of the procurement**

CivTech's mission is to drive daring and innovation in the public sector by collaboratively solving Challenges that make people's lives better – and in doing so create generations of sustainable, high growth businesses.

CivTech brings together public sector expertise and private sector innovation to solve real problems, develop new products, and deliver better, faster and easier services for everyone. Central to the approach is co-production with the citizen.

Part of the Scottish Government's Digital Directorate, CivTech's approach is helping transform public sector engagement with tech and innovation, delivering significant benefits to public services, producing genuine uplifts for the Scottish economy - and along the way, making lives better.

Across the country there are problems public sector organisations would like to solve and in the current environment the need for smart, efficient and effective products has never been greater. The Scottish Government is aware innovation is a good way to create them and is committed to ensuring a large part of its tech spend goes to smaller, innovative businesses. This is where CivTech comes in.

The CivTech Innovation Flow is designed to create products as quickly and effectively as possible, and uses a true Accelerator model at the heart of its Innovation Flow model. For you – whether you're an individual, team or company – it's an opportunity to take on a Challenge, solve it, and win contracts with a blue-chip public sector organisation. You'll build a product, and a business to take it as far as possible. Because here's the kicker: the Challenges we issue aren't 'single organisation' problems – most exist worldwide.

In short: Open Challenges are set. Any organisation, team or individual can respond. Applications are assessed, and shortlisted proposals go into an Exploration Stage where they're developed further [for which participating applicants are paid]. The best go through to the Accelerator – a period of intensive work to create the solution, and through

CivTech's unique business workshop system, a business capable of taking the product to the world.

This Challenge is also one of the first being launched as part of the Innovate for Nature strategy, and falls under Mission 3. For more information on Innovate for Nature and its Missions please visit the dedicated page on our website.
