V.2.5) Information about subcontracting

The contract/lot/concession is likely to be subcontracted

Value or proportion likely to be subcontracted to third parties

Proportion: 90 %

Section VI. Complementary information

VI.3) Additional information

The Contracting Authority considers that the modification is permitted under each of Regulation 72(1)(a). Under the contract, the services specification references the optional pathology test services including the appropriate equipment and consumables which are available to be called off by the Contracting Authority to facilitate its healthcare and related services. This specifically includes Serology and Allergens. In addition, the charges schedule permits the Contracting Authority to add such optional test services to the scope of the Service Provider's solution deployed under the contract. It is clear that the contract's intention was to future proof the contract to the extent possible, and Serology and Allergens test services was envisaged at the time of the contract. The Contracting Authority considers that the original contract permitted this modification and envisaged these services at the time of the contract. In addition, this modification would not alter the overall nature of the contract. Therefore, the Contracting Authority's intention to modify the contract is justified on the basis of Regulation 72(1)(a). In addition, the overall cost for including the Serology and Allergens services in the contract will not exceed 50% of the value of the original contract.
