Published 30 January 2026, 4:37pm

Changes to notice

This notice has been edited. The [previous version](#) is still available.

Tender clarification document submitted, to provide clarity on tender timeline. Also, reference in the clarification document that queries should be sent through to andy.moreland@dll.co.uk in the first instance.

Scope

Description

Tender Notice for UK Leisure Framework 2026-2034.

Commercial tool

Establishes a framework

Total value (estimated)

- £6,000,000,000 excluding VAT
- £7,200,000,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 18 June 2026 to 17 June 2034
- Possible extension to 17 June 2036
- 10 years

Description of possible extension:

The justification for having an option to extend the framework period for a further two years as either, two, one-year extensions or a single two-year extension follows the same rationale and approach as the 8-year term. The longer the term the greater the opportunity available to achieve value for money with a dedicated leisure specialist, developing sustainable and robust business models and delivering these in a competitive environment with a high emphasis on risk management and fixed price building contracts.

Options

The right to additional purchases while the contract is valid.

Schedule 8 modifications including - the right to additional purchases whilst the contract is valid. Adding additional scope of services that relate to the original scope of service areas and transfer on corporate restructuring.

Framework

Maximum number of suppliers

1

Maximum percentage fee charged to suppliers

1%

Further information about fees

Proposed fees are detailed in the Invitation to Tender document, and range on a scale - based on project value.

Justification for framework term over 4 years

DLL consider that the 8-year duration is justified due to the initial investment required to support the size of the team required to deliver the broad range of services and specialist advice required. The necessity to have and develop a quality supply chain is essential to the framework and delivering the quality product demanded of it. DLL is of the opinion that allowing the framework to mature, it will enhance and improve the quality of the product and streamline the delivery on subsequent projects. All the above will also generate cost savings over the framework life due to this developed streamlined process. Further, the streamlined process will drive time improvement in the pre-contract process with these matured and aligned supply chain partners. The framework is designed to deliver projects quickly as a result of the experience of the specialist Delivery Partner being sought, conversely it can also deal with long lead funding streams and introduce funding when required.

Framework operation description

Details of the Framework are included within the Phase 1 Tender document.

Award method when using the framework

Either with or without competition

Contracting authorities that may use the framework

Contracting authorities throughout the UK will be able to access the Framework.

Participation

Legal and financial capacity conditions of participation

As per tender document.

Technical ability conditions of participation

As per tender document.

Particular suitability

Small and medium-sized enterprises (SME)

Submission

Enquiry deadline

Award decision date (estimated)

18 June 2026

Award criteria

Name	Description	Type	Weighting
Quality	As per tender document.	Quality	75.00%
Price	As per tender document.	Price	25.00%

Other information**Description of risks to contract performance**

Whilst there is an expectation the successful bidder will have robust governance, business continuity and risk management arrangements in place, it is recognised that certain external factors could impact the delivery of the contract. These risks are largely outside the direct control of either party but are actively monitored and mitigated wherever possible.

Local and regional risks may include workforce availability challenges, industrial action, local infrastructure disruption, or supplier failure within the regional supply chain. Changes in local authority policy, funding pressures, or community demand could also influence service delivery expectations. It is expected these risks will be mitigated through workforce planning, strong supplier management, contingency arrangements and close engagement with local stakeholders.

National risks include changes in legislation, regulation or public policy that affect employment, health and safety, data protection, or service standards. Economic pressures such as inflation, increased energy costs, or labour market shortages could impact operating costs or resource availability. There is also the potential for national industrial action or public sector reform to affect performance. There is an expectation these risks are attempted to be managed through horizon scanning, flexible financial planning, compliance monitoring, and adaptive service models.

International and global risks include major events such as pandemics, geopolitical instability, war, terrorism, or global supply chain disruption. These events can lead to workforce shortages, increased costs, reduced availability of materials or services, and changes in customer behaviour or demand. Climate-related events and global economic volatility also present longer-term risks. There is an expectation these risks are attempted to be managed through business continuity planning, diversified supply chains, remote and flexible working capability where appropriate, and regular review of emergency response arrangements.

Overall, it is hoped that whilst these risks could impact the contract if they materialise, a proactive and proportionate approach to risk management will help to alleviate them in all but the worst-case scenarios.

Applicable trade agreements

- Government Procurement Agreement (GPA)

Conflicts assessment prepared/revised

Yes

Procedure

Procedure type

Competitive flexible procedure

Competitive flexible procedure description

Following a restrictive selection process as detailed in the ITT document and specific questionnaire the shortlisted Tenderers will submit an initial solution following which clarification and dialogue will take place and concluding with the submission of a final tender.
