II.1.3) Type of contract

Services

II.1.4) Short description

The Social Mobility Commission (SMC) monitors progress towards improving social mobility in the UK and promotes social mobility in England. It is an independent statutory body created by an Act of Parliament.

As part of its remit, the Commission undertakes an annual State of the Nation report. This report is part of the Commission's statutory duty to monitor UK-wide progress on social mobility each year. The production and synthesis of key statistics related to social mobility will be the central part for the report, which will be published by 31 March 2023, in order to examine, for example, social mobility 'hot' and 'cold' spots in the UK, and break down social mobility by protected characteristics.

For 2023, the SMC will, for the first time, fully operationalise its new Social Mobility Index: a refreshed measurement framework (the SMI). The new framework completely revises the previous social mobility index, which ran from 2016 to 2017.

The new and improved SMI offers a much more accurate and robust framework to measure social mobility. It includes four main components: drivers (or enablers), intermediate outcomes (such as educational attainment) and their relationship to socio-economic background; the overlap between socio-economic background and characteristics such as sex, ethnicity, disability and place; and eventual social mobility outcomes with respect to occupation, income, education, housing and wealth.

The 2023 report will therefore have some similarities to the 2017 and 2022 State of the

Nation Reports. It will build on the work of these reports to analyse the social and economic drivers and indicators of people's social mobility. As the old index did, we envision this updated one to also assess how social mobility outcomes compare in national, regional and local geographic places. We focus on measuring the extent to which rates of social mobility are improving over time in the UK and across the different parts of the UK, and which specific groups in society have greater or lesser chances of social mobility.

The SMC is looking for a supplier who can provide robust analyses both from cross-sectional and longitudinal perspectives, and interpret these statistics to give a clear narrative about what they mean for social mobility. The SMC is seeking a supplier who can work with the secretariat to provide analytical and statistical outputs and provide clear instruction for how the team can conduct the same analyses in future. Replicable analytical procedures form a key component of what we require to ensure the team gains analytical independence to conduct the same analyses in future. The SMC also expects a supplier to bring a high level of quality assurance to the work, arranging for independent analytical checks throughout the project.

Additionally, having the ability to interpret and support the SMC to provide a narrative around these findings is vital, particularly in light of the wide-ranging impacts of Covid-19 on social mobility. The SMC will therefore be assessing bids both for evidence of being able to deliver the analytical work and interpreting the findings in a wider social mobility context.

Failure to return Bids by the time and due date or in the required format may disqualify Bidders from consideration.

II.1.5) Estimated total value

Value excluding VAT: £150,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 73210000 - Research consultancy services
 - RD07 - In social sciences

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The Social Mobility Commission (SMC) monitors progress towards improving social mobility in the UK and promotes social mobility in England. It is an independent statutory body created by an Act of Parliament and is sponsored by the Cabinet Office.

As part of its remit, the Commission undertakes an annual State of the Nation report. This report is part of the Commission's statutory duty to monitor UK-wide progress on social mobility each year. The production and synthesis of key statistics related to social mobility will be the central part for the report, which will be published by 31 March 2023, in order to examine, for example, social mobility 'hot' and 'cold' spots in the UK, and break down social mobility by protected characteristics.

The Commission is seeking a supplier to provide new and insightful analysis on key statistics for inclusion in our State of the Nation report this year. The successful supplier will create these statistics and work with our internal report team to interpret and build a narrative around these figures for the 2023 report. This report forms part of the Commission's statutory remit and is laid before parliament.

For 2023, the SMC will, for the first time, fully operationalise its new Social Mobility Index: a refreshed measurement framework (the SMI). The new framework completely revises the previous social mobility index, which ran from 2016 to 2017. This previous index focussed on differences in children's educational outcomes across English local authorities, together with some measures of social conditions (but did not include any final social mobility outcomes at all). In other words, it told us what local areas were doing well on various education and employment measures, but not actually what the rates of social mobility were.

The new and improved SMI offers a much more accurate and robust framework to measure social mobility. It includes four main components: drivers (or enablers), intermediate outcomes (such as educational attainment) and their relationship to socio-economic background; the overlap between socio-economic background and

characteristics such as sex, ethnicity, disability and place; and eventual social mobility outcomes with respect to occupation, income, education, housing and wealth.

The 2023 report will therefore have some similarities to the 2017 and 2022 State of the Nation Reports. It will build on the work of these reports to analyse the social and economic drivers and indicators of people's social mobility. As the old index did, we envision this updated one to also assess how social mobility outcomes compare in national, regional and local geographic places. We focus on measuring the extent to which rates of social mobility are improving over time in the UK and across the different parts of the UK, and which specific groups in society have greater or lesser chances of social mobility.

The SMC is looking for a supplier who can provide robust analyses both from cross-sectional and longitudinal perspectives, and interpret these statistics to give a clear narrative about what they mean for social mobility. The SMC is seeking a supplier who can work with the secretariat to provide analytical and statistical outputs and provide clear instruction for how the team can conduct the same analyses in future. Replicable analytical procedures form a key component of what we require to ensure the team gains analytical independence to conduct the same analyses in future. The SMC also expects a supplier to bring a high level of quality assurance to the work, arranging for independent analytical checks throughout the project.

Additionally, having the ability to interpret and support the SMC to provide a narrative around these findings is vital, particularly in light of the wide-ranging impacts of Covid-19 on social mobility. The SMC will therefore be assessing bids both for evidence of being able to deliver the analytical work and interpreting the findings in a wider social mobility context.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6) Estimated value

Value excluding VAT: £150,000

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

10

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: Yes

Description of options

The Contracting Authority has the option to extend the contract for a further 3 months.

Section III. Legal, economic, financial and technical information

III.1) Conditions for participation

III.1.2) Economic and financial standing

Selection criteria as stated in the procurement documents

III.1.3) Technical and professional ability

Selection criteria as stated in the procurement documents

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Open procedure

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

IV.2) Administrative information

IV.2.2) Time limit for receipt of tenders or requests to participate

Date

2 May 2022

Local time

12:00pm

IV.2.4) Languages in which tenders or requests to participate may be submitted

English

IV.2.6) Minimum time frame during which the tenderer must maintain the tender

Tender must be valid until: 17 May 2022

IV.2.7) Conditions for opening of tenders

Date

2 May 2022

Local time

12:01pm

Section VI. Complementary information

VI.1) Information about recurrence

This is a recurrent procurement: No

VI.4) Procedures for review

VI.4.1) Review body

The High Court

Strand

London

WC2A 2LL

Country

United Kingdom
