II.2.4) Description of the procurement

The existing Tees Dock Number 2 Ro-Ro linkspan bridge was installed and commissioned in approximately 1990 and is an integral tank type structure which relies on a floating pontoon that uses air blowers to displace water from its ballast tanks to adjust the height of the pontoon to suit the draft of a ferry. This facility is an integral part of the Company's unitised operations and is utilised for daily sailings by the Company's existing customers.

As this facility is now coming to the end of its natural service life, the Company wishes to appoint a competent and suitably qualified and experienced contractor to design, manufacture, deliver, install, test and complete a replacement linkspan bridge for Tees Dock Number 2 RoRo.
