#### II.1.4) Short description

The Strathclyde Partnership for Transport (SPT) operated Glasgow Subway forms a circle in the centre-west of the city. The entire passenger railway is subsurface, comprising two circular routes, each of approximately 10.5km of slab track. Within a surface maintenance depot in Govan there is approximately 2.5km of ballast track. The system first opened to the public in 1896 and has since gone through various modernisation programmes, including at present.

Maintenance of the Subway track and infrastructure assets is undertaken typically by SPT in-house resource. To support its on-going preventative and reactive maintenance activities, SPT has a long-term agreement in place for supply of rail fastening assembly components, with the exception of rail pads. SPT is looking to award a long-term (up to 8 year) framework to a supplier(s) who is recognised for supplying rail pads and other similar of Track Fastening and Support Assemblies.
