Invasive Vegetation Control:

Management of all types of vegetation (woody or herbaceous) that is deemed an invasive species on the designated or conservation site which are outside of the establishment operations. Woody species include all tree species and shrubs such as Hemlock, Rhododendron and Gaultheria. Herbaceous species include all specified noxious weeds such as Japanese knotweed and shall include other species such as Gunnera, Balsam and Hypericum. Control of all Invasive vegetation will require a variety of techniques, including stem injection, cutting and spraying to ensure that the plants are controlled to an effective level.

There is no mulching or similar operation which require excavators or heavy plant machinery under these Contracts.
