### **Section I: Contracting authority**

#### **I.1) Name and addresses**

Ministry of Defence

Bristol

BS34 8JH

#### **Contact**

Maia Harris

#### **Email**

[Maia.Harris135@mod.gov.uk](mailto:Maia.Harris135@mod.gov.uk)

#### **Country**

United Kingdom

#### **Region code**

UK - United Kingdom

**Internet address(es)**

Main address

[www.des.mod.uk](http://www.des.mod.uk)

**I.3) Communication**

Additional information can be obtained from the above-mentioned address

**I.4) Type of the contracting authority**

Ministry or any other national or federal authority

**I.5) Main activity**

Defence

---

**Section II: Object**

**II.1) Scope of the procurement**

**II.1.1) Title**

Procurement and In-Service Support for Radiological and Nuclear Detector

Reference number

707397450

**II.1.2) Main CPV code**

- 35113200 - Nuclear, biological, chemical and radiological protection equipment

**II.1.3) Type of contract**

Supplies

**II.1.4) Short description**

The DE&S Specialist Explosive Ordnance and Disposal (EOD), Exploitation and

Countermeasures (SEEC) Delivery Team (DT) have initiated a project for the Procurement and In-Service Support of a Radiological and Nuclear detector. The user group require the equipment to be capable of detecting both Gamma and Neutron emissions, monitor radiation levels to allow localisation of source and identify radioactive isotopes. A key component of the capability is that it can be mounted permanently (if required) onto the L3Harris T7 remote control vehicle (RCV). Furthermore, the capability must be able to display the information in real time to operators at the Incident control point (ICP) location and not hinder the routine operations of the RCV.

The aspiration is that the detector can interface (through both software & hardware) with the L3Harris T7 and therefore prospective interested parties in this upcoming tender need to be content with sharing and collaboration activity with L3Harris to maximise this integration. Moreover, equipment testing at ITT and post contract award by DE&S may be required.

The current assumption is that the solution is likely to be Modified Off The Shelf (MOTS) and will include a requirement for through-life support for the capability. Through-life support will include spares, repairs, software updates, safety and configuration/obsolescence management. The expectation is this capability will be in-service 2025 – 2035 although this is subject to change.

Full details shall be included at the Contract Notice and Invitation to Tender phase of the competition.

#### **II.1.5) Estimated total value**

Value excluding VAT: £3,000,000

#### **II.1.6) Information about lots**

This contract is divided into lots: No

### **II.2) Description**

#### **II.2.2) Additional CPV code(s)**

- 35000000 - Security, fire-fighting, police and defence equipment
- 50600000 - Repair and maintenance services of security and defence materials
- 75221000 - Military defence services

#### **II.2.3) Place of performance**

NUTS codes

- UK - United Kingdom

#### **II.2.4) Description of the procurement**

The DE&S Specialist Explosive Ordnance and Disposal (EOD), Exploitation and Countermeasures (SEEC) Delivery Team (DT) have initiated a project for the Procurement and In-Service Support of a Radiological and Nuclear detector. The user group require the equipment to be capable of detecting both Gamma and Neutron emissions, monitor radiation levels to allow localisation of source and identify radioactive isotopes. A key component of the capability is that it can be mounted permanently (if required) onto the L3Harris T7 remote control vehicle (RCV). Furthermore, the capability must be able to display the information in real time to operators at the Incident control point (ICP) location and not hinder the routine operations of the RCV.

The aspiration is that the detector can interface (through both software & hardware) with the L3Harris T7 and therefore prospective interested parties in this upcoming tender need to be content with sharing and collaboration activity with L3Harris to maximise this integration. Moreover, equipment testing at ITT and post contract award by DE&S may be required.

The current assumption is that the solution is likely to be Modified Off The Shelf (MOTS) and will include a requirement for through-life support for the capability. Through-life support will include spares, repairs, software updates, safety and configuration/obsolescence management. The expectation is this capability will be in-service 2025 – 2035 although this is subject to change.

Full details shall be included at the Contract Notice and Invitation to Tender phase of the competition.

The classification of the requirement is up to and including OFFICIAL-SENSITIVE.

#### **II.3) Estimated date of publication of contract notice**

30 June 2023

---

### **Section IV. Procedure**

#### **IV.1) Description**

##### **IV.1.8) Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: Yes

---

## Section VI. Complementary information

### VI.3) Additional information

#### Procurement Timescales & Contract Value

The estimated total contract value is circa £3m for a 5 year contract with the option to extend for a further 2 years. Estimated timescales are Pre-Qualification Questionnaire (PQQ) mid 2023, Invite to Tender early 2024 and entry to service late 2024.

#### Early Engagement and Market Intelligence

The Authority is interested in understanding the capabilities in the market to help inform the development of the requirement. Please provide a brief of up to 750 words detailing your capability and potential solutions to the requirement along with a price list and any potential risk/ issues that the Authority should consider. Please also include further information on the product maturity/ technology readiness level in line with the enter service date of 2024.

Your brief should be addressed to [Maia.Harris135@mod.gov.uk](mailto:Maia.Harris135@mod.gov.uk). Please provide your brief no later than 19 May 2023.

This information shall not be used by the Authority to down select but shall help inform the development of the requirement and contracting strategy only.

#### Industry Day

Prior to initiating the procurement, the Authority intends to hold an Industry Day (date and location to be confirmed). Attendance will be by application only and the details of that process will be briefed in due course to the responders of this PIN.

The purpose of the industry day, and the follow-on engagement, is principally to brief the CMD requirement, without commitment at this stage, and to:

- Help MOD better understand market capability
- Ensure that the requirement is accurately understood and deliverable
- Invite industry, on a 1 to 1 basis, to showcase their capabilities to effectively develop and implement potential solutions, whilst mitigating the key risks

#### Contract Notice and Pre-Qualification

The Authority intends to publish a Contract Notice and initiate Supplier Selection in 2023 with a Dynamic Pre-Qualifying Questionnaire (DPQQ) to follow thereafter. Full details on how to express your interest in this requirement shall be published in the Contract Notice.

#### Further Information

You must not take this announcement to mean confirmation that MOD shall award a contract for this requirement. The MOD is publishing this announcement without any commitment to issue a tender or place a contract. Accordingly, any expenditure, work or effort undertaken before contract award is a matter solely for the commercial judgement of potential suppliers.
