II.2.4) Description of the procurement

Oracle Exadata is an advanced integrated hardware and software database platform. It is a proprietary technology created by Oracle for high end database workloads. Oracle provide the technology as a service offer through private and public cloud. The generation 1 platform has now been superseded by hybrid cloud appliances and the hardware and software have reached the end of life.

The proposed single supplier contract will provide for the ongoing use of this service whilst Seer is migrated to a new platform (Seer 2), including hardware and software maintenance and support as well as professional services.
