Section II: Object

II.1) Scope of the procurement

II.1.1) Title

(NU/1876) Supply of a Hydraulic Loading System

Reference number

DN657121

II.1.2) Main CPV code

• 38000000 - Laboratory, optical and precision equipments (excl. glasses)

II.1.3) Type of contract

Supplies

II.1.4) Short description

The School of Engineering, within the Faculty of Science, Agriculture and Engineering at

Newcastle University, requires a hydraulic loading system for a wide range of research and

teaching activities to be undertaken in their Heavy Structure Laboratory. The system will

Page 3 to 10

be

capable of applying static, cyclic and dynamic loads to steel timber and concrete

members.

We have an international reputation in modelling and simulation, working in both

application

and analysis of problems, and in the development of numerical methods and constitutive

models. The new system will enable continued excellence of research and teaching with

respect to structural textiles and polymeric composites, structural optimisation and

reliability seismic engineering and extreme loadings.

The scope of this contract is for the supply, delivery and installation and commissioning of

the equipment detailed in the ITT to the University, with after-sales support and 12 months

warranty and maintenance.

Expressions of interest in this project can be made by registering via the University's

etendering portal at:

https://procontract.duenorth.com/Advert?advertId=e01cca76-17b1-ed11-811f-005056b64
