II.1.4) Short description

Abri are seeking the provision of a group-wide connectivity provider for our sites. Abri currently utilises SD-WAN technology for our network backbone and this is rolled out to every site. Our current contracts expire in 2022. All sites in the 'East' geography (former-Radian) are running on new connectivity, specified according to size and number of staff at sites. A redundant link is available at every site, ranging from 4G, PSTN to 1GB/1GB geo-diverse standby. Abri only require these to be taken on by a new supplier and no installation or configuration. Sites in the 'West' have had lines converted from MPLS to FTTC to facilitate SD-WAN, but this was a tactical solution deployed with the incumbent supplier. The edge routers in use are old and should be replaced along with new lines and redundancy where appropriate.
