## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

CivTech 8.3 - How can technology help to create a nature network by 2030 across all of the different areas of Scotland?

#### **II.1.2) Main CPV code**

- 72000000 - IT services: consulting, software development, Internet and support

#### **II.1.3) Type of contract**

Services

#### **II.1.4) Short description**

A Nature Network connects areas of land and freshwater that are important for nature, including protected areas and restoration projects, by enhancing and developing corridors and stepping-stones between them to allow habitats and species that rely on them to thrive. An effective Nature Network is an essential tool to reverse biodiversity declines. In Scotland Nature Networks will address local priorities for nature, ensure connectivity and restoration across landscapes, and support urban-rural connectivity. Local authorities local development plans will facilitate the creation of Nature Networks and continue to strengthen the connections between them.

#### **II.1.6) Information about lots**

This contract is divided into lots: No

#### **II.1.7) Total value of the procurement (excluding VAT)**

Value excluding VAT: £602,338

### **II.2) Description**

#### **II.2.2) Additional CPV code(s)**

- 90710000 - Environmental management
- 90733300 - Surface water pollution protection services

#### **II.2.3) Place of performance**

NUTS codes

- UKM - Scotland

#### **II.2.4) Description of the procurement**

CivTech's mission is to drive daring and innovation in the public sector by collaboratively solving Challenges that make people's lives better – and in doing so create generations of sustainable, high growth businesses.

CivTech brings together public sector expertise and private sector innovation to solve real problems, develop new products, and deliver better, faster and easier services for everyone. Central to the approach is co-production with the citizen.

Part of the Scottish Government's Digital Directorate, CivTech's approach is helping transform public sector engagement with tech and innovation, delivering significant benefits to public services, producing genuine uplifts for the Scottish economy - and along the way, making lives better.

Across the country there are problems public sector organisations would like to solve and in the current environment the need for smart, efficient and effective products has never been greater. The Scottish Government is aware innovation is a good way to create them and is committed to ensuring a large part of its tech spend goes to smaller, innovative businesses. This is where CivTech comes in.

The CivTech Innovation Flow is designed to create products as quickly and effectively as possible, and uses a true Accelerator model at the heart of its Innovation Flow model. For you – whether you're an individual, team or company – it's an opportunity to take on a Challenge, solve it, and win contracts with a blue-chip public sector organisation. You'll build a product, and a business to take it as far as possible. Because here's the kicker: the Challenges we issue aren't 'single organisation' problems – most exist worldwide.

In short: Open Challenges are set. Any organisation, team or individual can respond. Applications are assessed, and shortlisted proposals go into an Exploration Stage where they're developed further [for which participating applicants are paid]. The best go through to the Accelerator – a period of intensive work to create the solution, and through CivTech's unique business workshop system, a business capable of taking the product to the world.

This Challenge is also one of the first being launched as part of the Innovate for Nature strategy, and falls under Mission 3. For more information on Innovate for Nature and its Missions please visit the dedicated page on our website.
