Contract

Dedalus- PAS/XPR Services

Business Services Organisation

F03: Contract award notice

Notice identifier: 2024/S 000-010330

Procurement identifier (OCID): ocds-h6vhtk-044e57

Published 28 March 2024, 2:35pm

Section I: Contracting authority

I.1) Name and addresses

Business Services Organisation

James House 2-4 Cromac Avenue

Belfast

BT7 2JD

Contact

Catherine Fegan

Email

cathy.fegan@hscni.net

Telephone

+44 2895362561

Country

United Kingdom

Region code

UKN06 - Belfast

Justification for not providing organisation identifier

Not on any register

Internet address(es)

Main address

<http://www.hscbusiness.hscni.net/>

I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Health

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Dedalus- PAS/XPR Services

Reference number

DAC12216

II.1.2) Main CPV code

- 72000000 - IT services: consulting, software development, Internet and support

II.1.3) Type of contract

Services

II.1.4) Short description

License, Support & Maintenance for XPR/PAS Access to XPR Database that is managed by Dedalus and is directly linked to the Patient Administration system (PAS).

With encompass roll out not due to complete until 2025, the new NIDIS service still needs to be able to send demographics and HCN number data to the XPR for those Trusts still using PAS. Without this there is a risk to patient safety and will cause fragmentation of patient records.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £308,356.95

II.2) Description

II.2.3) Place of performance

NUTS codes

- UKN - Northern Ireland

II.2.4) Description of the procurement

License, Support & Maintenance for XPR/PAS Access to XPR Database that is managed by Dedalus and is directly linked to the Patient Administration system (PAS).

With Encompass roll out not due to complete until 2025, the new NIDIS service still needs to be able to send demographics and HCN number data to the XPR for those Trusts still using PAS. Without this there is a risk to patient safety and will cause fragmentation of patient records.

These services have been supplied by Dedalus as part of their Managed Service until now. The services are required until Encompass is live in all 5 Trusts.

The prices, volumes and duration of the DAC will be minimised by cancelling the contract as soon as Encompass is live in all 5 Trusts and there is no longer a requirement for the service.

The long-standing relationship that BSO has with the current patient administration system (PAS), currently managed by Dedalus, has enabled us to obtain similar pricing to what was previously purchased under the Steria contract. Dedalus has taken into consideration the length of service from the previous 3rd party providers contract when creating a quotation directly for BSO.

There will be no requirement for this service once Encompass is live in all of the five Trusts.

In terms of duration, there will be no further need to "keep the lights on" the system beyond Encompass go live on all Trusts as NIDIS will no longer need to access XPR when Encompass fully live.

II.2.5) Award criteria

Price

II.2.11) Information about options

Options: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The services can be provided only by a particular economic operator for the following reason:
 - absence of competition for technical reasons

Explanation:

The regional GP OOH clinical information system (Adastra and Odyssey) is the central piece of the GP OOH ICT infrastructure. DXC and via their contractual relationship with Advanced provide a managed service to provision and support these services.

The Regional GP Out of Hours (GP OOH) service provides, for urgent conditions, a comprehensive, safe and efficient Out of Hours Service to the Northern Ireland population, who are also entitled to General Medical Services (GMS) services until the patient's own GP surgery is next open." During the covid pandemic the OOH service was expanded to provide an in hours Phone First Service for Trust ED departments directing patients to the most appropriate point of care. The Phone First services have continued post pandemic and will continue for the foreseeable future. This also expanded the service from an out of hours (6:00pm to 8:00am) service to a 24x7x365 service.

There are 5 Out of Hours Providers commissioned by the Department of Health Strategic Planning and Performance Group (SPPG) to provide the GP Out of Hours Service to the population of Northern Ireland. These five GP Out of Hours provider organisations in Northern Ireland deal with over 600,000 patient contacts per year.

The services are required to provide continued management maintenance and support of the Regional GP Out of Hours Clinical information system and the supporting IT services that enable its operation.

Moving to an alternative provider incorporating all of the required managed services provided by DXC is not possible before the expiry of the current contract. Transferring the technical support services, experience, and expertise that DXC provide to another supplier without an appropriate knowledge and skills transfer process would be extremely high risk to the continued operation of the GP Out of Hours service and could not be done safely within the time currently available. We estimate it would take at least six months to

safely transfer the support of these services to another provider and this would require both DXC as the current provider and the new provider to be involved jointly in the hand over process.

Failure of the OOH service means that patients, by default, will attend the already overburdened Emergency Departments.

Outside of Advanced, who currently provide the out of hours software solution to over 95% of UK and ROI service providers there are only two other suppliers across the whole of the UK and Ireland.

One is the GP software provider TPP - their software is used by one small OOH provider in England. The TPP solution does not have all the added benefits such as Nurse Triage and integrated decision support. This would not be sustainable in NI as the numbers of GPs available to provide OOH services is diminishing and service is moving to increase the use of nurses and other multidisciplinary teams. The TPP solution does not integrate with the current infrastructure in Northern Ireland for example NIECR nor does it provide the messaging services to GP Practices following a consultation with the Out of Hours service. Considerable development work, requiring additional time and cost, would be required to facilitate development of this functionality.

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

Section V. Award of contract

Contract No

DAC12216

Title

Dedalus- PAS/XPR Services

A contract/lot is awarded: Yes

V.2) Award of contract

V.2.1) Date of conclusion of the contract

28 March 2024

V.2.2) Information about tenders

Number of tenders received: 1

The contract has been awarded to a group of economic operators: No

V.2.3) Name and address of the contractor

Dedalus

Suite 1 Riverside Studios 2 Embankment Sovereign Street

Leeds

LS1 4BA

Country

United Kingdom

NUTS code

- UKE42 - Leeds

Companies House

12790545

The contractor is an SME

No

V.2.4) Information on value of contract/lot (excluding VAT)

Total value of the contract/lot: £308,356.95

Section VI. Complementary information

VI.4) Procedures for review

VI.4.1) Review body

Business Services organisation

Belfast

BT72JD

Country

United Kingdom
