#### II.2.4) Description of the procurement

Lot 1 - Driver Risk assessment and Associated learning

• Access to an individual risk assessment tool for all business drivers. The assessment can be completed electronically and on mobile devices, tablets etc. but with contingency for those staff without access to e-mail or electronic devices.

• Engaging and relevant - the assessments will be tailored to reflect different situational and behavioural risk factors such as vehicle type, levels of driver experience etc and may draw on real time telematics or app-based data.

• Comprehensive reporting with overall risk summaries and explanation of typical behaviours associated with specific risk categories as well as initial advice and guidance about reducing risk.

In addition to the risk assessment tool there are specific training requirements within this Lot:

• Training interventions designed to address hazards and risks identified through the risk assessment. The interventions should be aligned with specific risk categories and will be blended to form individual learning pathways.

• Bite-sized learning modules which will typically be video-based, will be used to create continuous engagement opportunities and will supplement more formal e-learning, classroom training and / or practical 'in vehicle' instruction.

• New starters at the ST Group Companies would be included as part of the audience for risk assessment and training - assuming they drive a company vehicle or undertake business mileage in a private vehicle.
