II.1.1) Title

NGESO Software/Hardware Technology Products & Associated Services

II.1.2) Main CPV code

- 72222300 - Information technology services

II.1.3) Type of contract

Services

II.1.4) Short description

National Grid Electricity System Operator (NGESO), a legally separate business within the National Grid Group (NGG), is the electricity system operator for Great Britain. The NGESO moves electricity around the system to keep homes and businesses supplied with the energy they need 24/7.

National Grid Electricity System Operator (NGESO) became a legally separate business in 2019. NGESO is on a journey to become NESO (National Energy Systems Operator), divested from NGG to transition under UK government ownership during Summer 2024. For this notice, any mention of NESO should be interpreted to also include NGESO during the interim period leading up to the official change.

The Digital, Data and Technology (DD&T) organisation within NGESO provides the sourcing capabilities, roles and skills required to achieve NESO digital deliverables.

To support the role of the National Energy System Operator (NESO), a multi-supplier Framework Contract is sought for the supply of Software/Hardware Technology Products & Associated Services, which enables the delivery of a long-term corporate software and hardware procurement strategy for key SW publishers and OEMs or authorised distributors licences, products, and services. This is complemented by the need for a separate Managed Service Provider (MSP) to provision services for lifecycle & contract management, operating as a Vendor Management Organisation (VMO) which enables the management and performance evaluation of software and hardware contracts for the portfolio.

NESO requires access to software and hardware in a flexible way to achieve objectives under its Business Plan and Digital Strategy, whilst building relationships with specialist

suppliers who can partner in developing strategic direction.

The expected time duration of an engagement will be approximately 3 years with possible extensions, subject to confirmation in the Contract Notice.

The scope of the framework will comprise of COTS business and specialist software, infrastructure hardware and associated services, including Vendor Management. Currently these are separated into 3 lots shown below, but this may be subject to change before a Contract Notice is issued:

Lot 1: Software Licences, Support Maintenance & Associated Services

Lot 2: Hardware, Support Maintenance & Associated Services

Lot 3: Vendor Management Organisation (VMO) - Associated Services for Software/Hardware contract & vendor management

The lotting structure will be designed to suit a holistic or a more specialised approach to enable access to large companies and niche suppliers having places within the framework.

These lots will be structured as NESO sees fit for its Contract Notice. Achilles UVDB Codes within this PIN indicate the specialism of services that may be required. Those companies who are equipped to offer the services should seek to be registered for these UVDB codes listed later in this document.

The procurement is covered by the Government Procurement Agreement: No

IV.2) Administrative information

IV.2.4) Languages in which tenders or requests to participate may be submitted

English

Section VI. Complementary information

VI.3) Additional information

All information provided in this notice should be considered indicative in nature and no overall decision on the lotting structure and exact scope have yet been made.

This notice is not a formal request for expressions of interest. There will be no further publication on Find a Tender in relation to this opportunity as the procurement will be run through the qualification system, and references to a "Contract Notice" should be read as referring to an advert on UVDB.

NESO is not obliged to respond to any correspondence related to this notice. Direct or indirect canvassing of NESO (or any person connected with it) by any person concerning this notice, or any attempt to procure information outside of the defined process is discouraged and may (in certain circumstances) require the disqualification of the relevant person(s) from participation in any future competitive procurement process.

All information provided by NESO during this notice is at an early stage of development, is not intended by NESO to create any contract or other commitment and is not intended by NESO to be otherwise relied on by any person to any extent. NESO shall have no liability for any losses incurred by any person as a result any such reliance.

Companies with interest should be fully registered to 'Silver Plus' standard on the Achilles UVDB qualification system by close of business on Friday 19th April 2024 and be registered against ALL UVDB Codes within the Lot in which they are interested to receive any future Contract Notice and be invited to the Pre-Qualification Stage for that Lot.

Desta Wheeler (Desta.Wheeler@achilles.com) can support with completion of your registration process on Achilles ahead of any future qualification event. It is the sole responsibility of each interested supplier to ensure that it is properly registered on UVDB on time and NESO accepts no responsibility for any failure to register on time regardless of the reasons for that.
