This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £266,310

II.2) Description

II.2.3) Place of performance

NUTS codes

- UKJ34 - Isle of Wight

II.2.4) Description of the procurement

Seaweed removal at Ventnor Haven, Isle of Wight.

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

II.2.14) Additional information

It is intended that the contract will commence on 04/05/2022. Any values listed are estimated and for the total contract period including the possible extension period.

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Negotiated without a prior call for competition

- The works, supplies or services can be provided only by a particular economic operator for the following reason:
 - absence of competition for technical reasons

Explanation:

The Isle of Wight Council intends to award a contract for a period of 2 years for the provision of seaweed removal from Ventnor Haven on the Isle of Wight using the negotiated procedure without prior publication on the basis that the management of the Haven was tendered previously with only 1 bidder showing interest. The bidder has invested, designed and manufactured its own specialist plant to dredge, macerate and pump the seaweed from the harbour. It is not deemed cost effective to put this out to tender due to high plant costs combined with the intention that within the 2-year period of this contract, the management and possibly ownership of the harbour will either transfer to a third party or if unsuccessful be advertised for a private operator to take over. Sediment and seaweed at Ventnor Haven has been a serious problem since the Haven was constructed in 2003. Sand and seaweed are continuously carried into the haven in suspension especially during periods of rough weather. Once trapped within the Haven the seaweed breaks down anaerobically producing noxious fumes including hydrogen sulphide based compounds known to be dangerous to health. The sand accumulates within the entrance forming a sand bar which reduces the time-frame that the Haven can be accessed for the local fishing fleet. To combat the problem the supplier has developed a shallow water mini dredger. The authority will be observing a 10 day standstill period which will expire at midnight on 03/05/2022.

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

Section V. Award of contract/concession

A contract/lot is awarded: Yes

V.2) Award of contract/concession
